Indian sugarcane production and cost trends

As per Indian Sugar Mills Association (ISMA) 136 sugar mills were in operation in the country as on 15th May 2022 of total and produced 34.9.7 Million Metric Tonnes of sugar, as compared to 30.36 Million Metric Tonnes produced by 44 sugar mills as on 15th May' 2021. This is 4.61 Million Metric Tonnes or 15.2% higher as compared to the last season's production for the corresponding period.

Sugar exports are estimated to increase to over 10 Million Metric Tonnes in the current sugar year ending September, from 7.1-7.2 Million Metric Tonnes in the previous year, on better demand for the Indian sweetener from Indian subcontinent, Middle East and Indonesia. About 7.7 Million Metric Tonnes of sugar have been either physically exported out of the country or lying at the ports during October 2021-May 2022 period, as compared to about 4.824 Million Metric Tonnes exported in the last sugar year during the same period.

We revised India's production estimate to 35.6 Million Metric Tonnes for the 2021-22 sugar year. Export estimates has also been revised to over 10 Million Metric Tonnes. Considering the above and domestic consumption of 27.6 Million Metric Tonnes, there will be a closing balance of 7.1 Million Metric Tonnes at the end of the sugar season on 30th September 2022. With Brazilian crops getting affected by frost in their 2021-22 crushing season,

Indian mills have used the opportunity well without any government support and Indian sugar so far has been exported to 74 countries in the current sugar season.

Statewise Analysis

Uttar Pradesh: Sugarcane is cultivated on about 2.7 million hectares in Uttar Pradesh. The whole of northern UP is a Ganna Pradesh.

The impact of sugarcane isn't only geographic. Taking an average one-hectare landholding, UP would have 2.7 million cane farmer families. The state produces 200 Million Metric Tonnes –plus of cane annually. All in all, some 4.5 million families in UP are directly dependent on sugarcane. Inclusive of their members, they add up to 20 million persons - one in every 12 of UP's total estimated 240 million populations.

The state has overtaken Maharashtra to be India's top sugar producer in the last five seasons (October-September) from 2016-17. It has also become the largest ethanol producer and the only state to achieve 10 per cent blending in petrol in 2020-21, one year ahead of the target for all-India.

Maharashtra : Maharashtra is expected to produce the most sugar in its history in the 2021-22 season, with a projected output of 13.8 Million Metric Tonnes, up 29% from the previous year. Maharashtra will be the nation's top sugar producer, surpassing Uttar Pradesh

Sugar cultivation in the state increased by 90,000 hectares last year due to a bountiful monsoon. From SS 2020-21 to SS 2021-22, the area under cane increased from 1.14 million hectares to 1.23 million hectares. As a result, sugar production is expected to increase from 10.6 Million Metric Tonnes in SS2021-22 to 13.8 Million Metric Tonnes in SS 21-22. Maharashtra will approximately produce 39 percent of the country's total output.

Maharashtra has had a good monsoon for the past three years. Sugarcane production in Uttar Pradesh has decreased

Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act. Accounting entries passed on the exercise of the judgment by the management are correct and reasonable.

C. RISK MANAGEMENT

To comply with the requirement of Companies Act 2013 and Regulation 21 of SEBI (LODR) Regulations, 2015, the Board of Directors have approved the Risk Management Policy and constituted a risk management Committee to monitor the implementation thereof. Salient features of the Risk Management Policy are as under:

- (i) Risk management is an intrinsic part of the strategic management of the Company.
- (ii) Risk management process comprises of – identification of risks, analyzing the same, deciding on the transfer or retention thereof and initiation of actions to mitigate the risks.
- (iii) Risks faced by the Company are classified into External and Internal risks.
- (iv) The external risks cover the political environment risks, government policies related risks, technological and product obsolescence risks.
- (v) The Internal risks cover the operating risks, financial risks, human risks, system risk, and credit risk.

RISKS IDENTIFICATION:

The Board of Directors has identified following risks to the Company:

EXTERNAL RISKS OR UNCONTROLLABLE RISKS

- (a) Raw Material Risk
- (b) Sugar Price Risk
- (c) Regulatory Risk
- (d) Cyclical Risk

(a) RAW MATERIAL RISK

Sugarcane is the principal raw material used for the production of Sugar. Business depends on the availability of Sugarcane and any shortage thereof adversely affects operations. A variety of factors beyond the Company's control may contribute to a shortage of Sugarcane in any given harvest period. Some of the main factors that could contribute to a shortage of Sugarcane are set forth below:

- i) Cane cultivation area and availability of irrigation facility.
- ii) Availability of higher yielding crop.
- iii) Diversion from cane production to other cash crops.
- iv) Diversion of Sugarcane to other industries like khandasari or gur and to neighboring factories etc.
- v) Adverse weather conditions, crop disease.
- vi) Cane procurement price declared by the state government and / or central government.
- vii) Cane price payment delays to the growers.

RISK MITIGATION

The risk can be mitigated by steps such as government encouragement for promotion of various irrigation schemes (lift irrigation, drip irrigation, improved canal system etc.), cane development schemes, improved infrastructure for road and communication, provision of better quality and higher yielding

seeds as well as fertilizers and pesticides, prompt clearance of cane dues of farmers and steps to improve their goodwill by adoption of social development measures. As regard cane procurement price by the state Govt. and / or central Govt., this is a systems risk which cannot be alleviated unless the Sugar cane price has linkage with the Sugar price on the basis of established and recognized formula and the Govt. announces subsidy and relief to the Sugar industry to facilitate timely cane price payment to the growers so that there is no fear among the growers either for cultivation /agitation or for-diversion of the cane from area.

(B) SUGAR PRICE RISK

The price of Sugar has a significant impact on Company's profits. Like other agricultural commodities, Sugar is subject to price fluctuations resulting from availability and price of raw material, weather, natural disasters, domestic and foreign trade policies, shift in supply and demand and other factors beyond the Company's control. Additionally, 15% to 30% of the total global Sugar production is traded on commodity exchanges which are speculative in nature and can adversely affect the global Sugar prices and in turn the price of Sugar in domestic market.

RISK MITIGATION

The Company is unable to mitigate this risk because it does not have control on the market forces and the regulatory prices. However, Sugar price can be improved to some extent by producing bolder grain of Sugar. Further, there appears to be a realization by the government that a reasonable level of Sugar price is necessary for survival of both the farmers and the Sugar industry.

REGULATORY RISKS

I) ENVIRONMENTAL RISK

The Industry & Company is subject to environmental regulations which are becoming more and more stringent and the Company may be exposed to liability as a result of handling of hazardous materials. Recently, the Central Pollution Control Board (CPCB) has directed the State Pollution Control Board to ensure zero liquid discharge in Sugar plants and distilleries. It involves installation of advance process technology with multi pressure distillation and integrated evaporator and incineration system in distillery unit. In the Sugar plants, the CPCB has directed to reduce waste water generation to 40 liters per ton of cane crush and installation of cooling tower. CPCB has also revised waste water generation to 200 liters for Sugar unit per ton. The regulations of pollution control have become extremely stringent along with time bound implementation plan and non-compliance includes non-renewal of the Annual factory license especially in distillery unit. It involves potential cost for installation of pollution control system in distillery and Sugar plants.

RISK MITIGATION

The only way to mitigate this risk is to follow the instructions of pollution control Board. However, the cost of installation of pollution control system is very high. Making huge investment in such systems raises the cost of production resulting in substantially reduced margin on sales. Moreover, borrowings from banks for investing in these equipment's is very difficult due to accumulated losses and negative net worth still being faced by the Company due to financial crisis faced by the Sugar industry in recent years. The Company is however continuing to take all measures to comply with the pollution control guidelines of the CPCB in both Sugar plant

and distillery. In distillery unit, the Company, while expanding its capacity from 25 klpd to 45 klpd in the year 2016/17, has installed the required equipment's to meet the norms of pollution. Now the Company capacity is 100 klpd and it had installed Incineration Boiler during the F.Y. 2021-22

GOVERNMENT POLICY RELATED RISKS

The Sugar industry is highly regulated and hence the Company operates in a highly regulated environment. Central and State Government policies and regulations are such as:

- i) State Advised Price (SAP) and Fair Remuneration Price (FRP) for Sugarcane.
- ii) Control on sale of molasses
- iii) High weightage of Sugar in wholesale price index vis-à-vis with other commodities

These affect the agricultural sector and related industries and affect our operations and our profitability. Ethanol business is highly dependent on government policy. Sugarcane price is controlled both by the State and Central Governments.

RISK MITIGATION

This is a systematic risk which cannot be alleviated unless the Sugar cane price has linkage with the Sugar price on the basis of established and recognized formula. The government should revise minimum support price of Sugar as it revises for other crops like wheat paddy etc.

D. CYCLICAL RISK

Being an agro based industry, the production and realization is very much dependent on the monsoon and other environmental factors which are cyclic in nature. At the same time switchover of the farmers from Sugarcane to some other cash crops for better realization badly affect the industry.

RISK MITIGATION

Although the Company has no control over the monsoon and other environmental factors, the results can be better if proper irrigation arrangements are made for the farmers which can be facilitated through state Govt. agencies.

2. CONTROLLABLE RISKS:

THESE RISKS INCLUDE:

1. Productivity risks
2. Drawal rate risks
3. Management bandwidth risks

Apart from the external reasons, there are risks associated with operational limitations i.e. old plant & machinery and no cogeneration facility, low recovery in comparison to the central and eastern region Sugar mills and higher conversion cost due to higher wage bill and higher maintenance cost.

RISK MITIGATION

1. Selection of appropriate machinery and maintenance of the same is critical for continuous operations during the crushing season. The Company has consistently operated at an optimum capacity of around 90% to 95% in most of the years.
2. For mitigating the poor drawal risk, Company is focusing on stable crushing rate and improving cane price payments.

CONTD.....

However, it is getting constrained in its all out efforts due to accumulated losses and negative net worth.

3. With its respected track record in the industry and professional work practices, the Company is able to hire and retain appropriate talent.
4. The key recommendations of the Rangrajan Committee on Sugar decontrol have garnered positive responses and are in line with industry expectations. The government has already implanted a number of steps barring the cane pricing policy. The linkage of the Sugarcane price with Sugar realization will bring in structural changes in the industry.
5. The Company is working as various options for taking up small projects in Sugar unit, for improvement of Sugar quality, saving in steam & bagasse consumption, Sugar cane development and improvement in processes efficiency, which can be taken up in phases over a period for 2 to 3 years. The Company had already expanded the capacity of its distillery unit from 70KL per day to 100KL per day.

3. FINANCE RISK:

The industry is highly dependent on timely availability of working capital as well as long term finance at competitive rate of interest for day to day operation, timely cane payment, cane development as well as modernization, technology development, expansion of Sugar and distillery and installation of pollution control systems.

Further there is also physical risk associated with the assets of the Company due to loss by fire, riot, strikes, malicious damages, thunderstorm, flood, theft, burglary, earthquake etc.

RISK MITIGATION

The lenders have generally been reluctant to take additional financial exposure in the Company mainly due to its low rating and due to negative net worth. The Company has been working on improving its operational and financial performance. The rating of the company for the financial year 2020-21 was B+ and the company had assigned the work of credit rating to Informerics Rating & Research Pvt. Ltd. and the same is awaited for the Financial Year 2022-23.

The Company has taken appropriate insurance policies for all its assets and against all standard risks except earthquakes.

4. HUMAN RESOURCES RISK

The Company's plants are located in Semi-rural area. This creates a challenge firstly in recruiting high level professional skills and secondly in retaining them.

RISK MITIGATION

Company has developed appropriate human resources policies to attract skills and to retain them. Continuous learning represents the cornerstone of the Company's human resource policy. The Company has adopted a progressive human resource policy to meet the aspirations of employees. It organizes training programmes and motivates its employees to attain greater efficiency and competence leading to effective retention. Value-centric management helps enhance loyalty. The Company provides various compensation packages and performance-based incentives. The Company is committed to provide equal employment opportunities and working conditions for attracting and retaining best available talent ensuring cosmopolitan workforce and does not make any discrimination on any basis.

SUGAR PRODUCTION AND CONSUMPTION: OPPORTUNITIES AND THREATS SUGAR PRICE:

Global sugar industry overview

Rallying energy markets, tight sugar availability, COVID lockdowns in China and logistical issues from the fallout of Russia's military invasion of Ukraine have led to a surge in spot sugar prices across the globe. This may result in higher sugar price volatility in the near future due to uncertainty about how the war progresses. The geopolitical events have increased input costs for growers. These costs need to be absorbed by producers and passed on to end-users, which has resulted in high spot sugar prices.

Global production for Marketing Year (MY) 2021-22 is estimated flat at 181 million tons, with the drop in Brazil expected to be offset by gains in the European Union, India, Russia, and Thailand. Consumption is expected to rise due to growth in markets including China, India, and Russia. Stocks are lowered due to a drop in China, Indonesia, and Thailand. Exports are expected to be flat as the steep rise in Thailand trade is offset by lower shipments from Brazil.

The average ex-works realization of Company's Sugar during first quarter till June 2022 was Rs. 3409.13 (last period Rs. 3182.99) per quintal. The price of Sugar is currently ruling around Rs. 3400/- 3500/- per quintal.

CANE PRICE:

The state government had increased Sugar cane price during the crushing season 2021-22 from 325 per quintal to Rs 350 per quintal.

OUTLOOK AND CHALLENGES BEFORE THE SUGAR INDUSTRY:

As on May 15, 2022 as per Indian Sugar Mills Association (ISMA) 136 sugar mills were in operation in the country as on 15th May 2022 of total and produced 34.97 Million Metric Tonnes of sugar, as compared to 30.36 Million Metric Tonnes produced by 44 sugar mills as on 15th May' 2021. This is 4.61 Million Metric Tonnes or 15.2% higher as compared to the last season's production for the corresponding period.

Sugar exports are estimated to increase to over 10 Million Metric Tonnes in the current sugar year ending September, from 7.1-7.2

CONTD.....

Million Metric Tonnes in the previous year, on better demand for the Indian sweetener from Indian subcontinent, Middle East and Indonesia. About 7.7 Million Metric Tonnes of sugar have been either physically exported out of the country or lying at the ports during October 2021-May 2022 period, as compared to about 4.824 Million Metric Tonnes exported in the last sugar year during the same period.

We revised India's production estimate to 35.6 Million Metric Tonnes for the 2021-22 sugar year. Export estimates has also been revised to over 10 Million Metric Tonnes. Considering the above and domestic consumption of 27.6 Million Metric Tonnes, there will be a closing balance of 7.1 Million Metric Tonnes at the end of the sugar season on 30th September 2022. With Brazilian crops getting affected by frost in their 2021-22 crushing season,

Indian mills have used the opportunity well without any government support and Indian sugar so far has been exported to 74 countries in the current sugar season.

Indian sugar cane production and cost trends

The sugar cane production in the country during 2021- 22 has been around 455 Million Metric Tonnes, which is projected to increase by more than 10% and cross the 500 Million Metric Tonnes mark in the next crop cycle that will start in October. Furthermore, the 10% increase will bring the production of sugar to 36 Million Metric Tonnes with a diversion of 4.5 Million Metric Tonnes, giving India an edge to bolster its ethanol production needs due to the growing crude oil prices.

Statewise analysis

Uttar Pradesh: Sugarcane is cultivated on about 2.7 million hectares in Uttar Pradesh. The whole of northern UP is a Ganna Pradesh. The impact of sugarcane isn't only geographic. Taking an average one-hectare landholding, UP would have 2.7 million cane farmer families. The state produces 200 Million Metric Tonnes –plus of cane annually. All in all, some 4.5 million families in UP are directly dependent on sugarcane. Inclusive of their members, they add up to 20 million persons — one in every 12 of UP's total estimated 240 million populations.

The state has overtaken Maharashtra to be India's top sugar producer in the last five seasons (October-September) from 2016-17. It has also become the largest ethanol producer and the only state to achieve 10 per cent blending in petrol in 2020-21, one year ahead of the target for all-India.

Maharashtra : Maharashtra is expected to produce the most sugar in its history in the 2021-22 season, with a projected output of 13.8 Million Metric Tonnes, up 29% from the previous year. Maharashtra will be the nation's top sugar producer, surpassing Uttar Pradesh.

Sugar cultivation in the state increased by 90,000 hectares last year due to a bountiful monsoon. From SS 2020-21 to SS 2021-22, the area under cane increased from 1.14 million hectares to 1.23 million hectares. As a result, sugar production is expected to increase from 10.6 Million Metric Tonnes in SS 2021-22 to 13.8 Million Metric Tonnes in SS 2021-22. Maharashtra will approximately produce 39 percent of the country's total output. Maharashtra has had a good monsoon for the past three years.

INDEPENDENT AUDITORS' REPORT

TO
THE MEMBERS OF
SIR SHADI LAL ENTERPRISES LIMITED

Report on the Standalone Ind AS Financial Statements

Opinion

We have audited the accompanying standalone financial statements of **Sir Shadi Lal Enterprises Limited ("the Company")** which comprises the Balance Sheet as at March 31, 2022, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information (here in after referred to as "the standalone financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015 as amended ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2022, and the loss, and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Companies Act, 2013 and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Key Audit Matters

Key Audit Matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and informing our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our audit report.

Sr.No	Key Audit Matters	Auditor's Response
	<p>The net worth of the company has since been eroded on account of operational losses incurred by the company up to the FY-2014-15, which was basically on account of low recovery of sugar from sugarcane. Whereas on account of improvement in the sugar manufacturing unit, during the season 2015-16, the recovery has substantially improved with the result that the company has earned profit during the year 2016-17. The company has also reported profit during the year ending on 31.03.2020 Rs.384.91 Lakhs as compare to loss Rs.1410.62 Lakhs during the year ending on 31.03.2021. The company is continuously striving for improvement in the operational efficiencies in other parameters. The company continues to operate at optimum levels and expects improvement in the operational efficiency in form of improvement in sugar recovery, increase of production of alcohol through using B Heavy molasses, reduction of overheads, finance and other cost. The Government has taken different measures to improve the financial health of sugar industry to fix obligation for export of sugar (MIEQ-minimum indicative export quota) to reduce sugar availability, fixation of minimum support price(MSP) for sugar.</p> <p>All these measures are expected to turnaround the operations of sugar industry on sustainable basis. As such the company will remain as a going concern and is likely to pay it's liabilities including cane dues from expected generation of cash flow. However the accumulated losses of the company as at 31.03.2022 were Rs. 13027.85 Lakhs(excluding revaluation reserve) as against the paid up capital of Rs 525 Lakhs.</p>	<p>Attention is invited to note no-55 of the financial statement where in it is explained that the company has significant losses which has resulted in erosion of net worth of the company as on 31.03.2022.</p> <p>The reason for improvement explained by the company in the said note -55 that it will continue as a going concern and it will likely to pay it's liabilities from expected generation of cash flow, are in our opinion uncertain. We are unable to comment up on the said uncertainties.</p>

CONTD...

OTHER INFORMATION

The Company’s Board of Directors is responsible for the other information. This Comprises the information included in the Director’s report, but does not include the financial statements and our auditor’s report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated if based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of Management and those charged with governance for the standalone financial statements

The Company’s Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 (“the Act”) with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India, specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of accounting policies; adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to

the preparation and presentation of the standalone financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the company’s financial reporting process.

Auditor’s Responsibilities for the Audit of standalone financial statement

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company’s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor’s report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the

standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

ANNEXURE 'B' TO THE INDEPENDENT AUDITORS' REPORT

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **SIR SHADI LAL ENTERPRISES LIMITED** ("the Company") as of March 31, 2022 in conjunction with our audit of the Standalone Ind AS Financial Statements of the Company for the year ended on that date.

MANAGEMENT'S RESPONSIBILITY FOR INTERNAL FINANCIAL CONTROLS

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

MEANING OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

LIMITATIONS OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Distillery business primarily comprises manufacture of Spirit, Alcohol and Ethanol.

Note No.2: Significant Accounting Policies

This note provides a list of the significant accounting policies adopted in the preparation of these financial statements. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of preparation and presentation**(a) Compliance with Ind AS**

The financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] (as amended from time to time) and other relevant provisions of the Act.

(b) Historical cost convention

The financial statements have been prepared on a historical cost basis except for certain assets and liabilities that are measured at fair values or revalued amount at the end of each reporting period, as explained in the respective accounting policies described in subsequent paragraphs.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except such as net realisable value in Ind AS 2 Inventories or value in use in Ind AS 36 Impairment of Assets. Land is carried in the balance sheet on the basis of revaluation model. Land is measured at fair value. The financial statements are prepared in INR and all values are rounded off to the nearest Lakhs except when stated otherwise.

(c) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. Refer note-51 for segment information presented.

(d) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of returns, rebates, other similar allowances and goods and services tax. The Company recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the Company and specific criteria have been met for each of the Company’s activities as described below.

(i) Recognising revenue from major business activities**a) Sale of goods**

Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Company; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2022

2.2 Interest income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

2.3 Impairment of non-financial assets

Non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

2.4 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

All other borrowing costs are expensed in the period in which they are incurred. Borrowing costs consist of interest and other cost that an entity incurs in connection with borrowing of funds.

2.5 Income tax

Income tax expense represents the sum of the tax currently payable and deferred tax.

a) Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

b) Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences, the carry forward of unused tax credits and unused tax losses to the extent that it is probable that taxable profits will be available against which those deductible temporary differences, the carry forward of unused tax credits and unused tax losses can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

c) Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

2.6 Property, plant and equipment

Property, plant and equipment are tangible items that are held for use in the production or supply for goods and services, or for administrative purposes and are expected to be used during more than one period. The cost of an item of property, plant and equipment

CONTD.....

**NOTES TO THE FINANCIAL STATEMENTS****For the year ended March 31, 2022**

shall be recognised as an asset if and only if it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Freehold land is carried at revalued amount. A revaluation surplus is recorded in OCI and credited to the assets revaluation surplus in other equity. Upon disposal any revaluation reserve relating to the particular land being sold is transferred directly to retained earning. Revaluation of freehold land will be conducted once in three years. All other items of property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditure and borrowing cost that is directly attributable to the acquisition of the items including borrowing costs. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The revaluation will be conducted every three year by the company.

Expenditure during construction period incurred on the projects under implementation are treated as pre- operative expenses pending allocation to the assets, and are included under "Capital Work-in-Progress". These expenses are apportioned to fixed assets on commencement of commercial production. Capital Work-in-Progress is stated at the amount incurred up to the date of Balance Sheet.

"Each part of item of property, plant and equipment, if significant in relation to the total cost of the item, is depreciated separately. Further, parts of plant and equipment that are technically advised to be replaced at prescribed intervals/period of operation, insurance spares and cost of inspection/overhauling are depreciated separately based on their specific useful life provided these are of significant amounts commensurate with the size of the Company and scale of its operations. The carrying amount of any equipment / inspection / overhauling accounted for as separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred."

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Transition to Ind AS

On transition to Ind AS, the Company has elected to continue with the carrying value of all of its property, plant and equipment recognised as at 1 April 2016 (transition date) measured as per the previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

Depreciation methods, estimated useful lives and residual value

Depreciation commences when the assets are available for their intended use. Depreciation on Fixed Assets is provided on the written down value method in accordance with Schedule II of the Companies Act, 2013 and adopted useful life as stated in Schedule II along with residual value of 5% of the cost of assets except, fixed assets individually costing upto Rs. 5000 is being fully depreciated in the year of purchase.

Intangible Assets are recognized as specified in the applicable Accounting Standard and are amortized in 36 Months

The estimated useful life, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

2.7 Intangible assets

Intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses.

Amortisation is recognised on a straight-line basis over their estimated useful life. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Estimated useful lives of the intangible assets are as follows:

Assets	Estimated useful life
Computer software	36 months

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, is recognised in profit or loss when the asset is derecognised.

Transition to Ind AS

On transition to Ind AS, the Company has elected to continue with the carrying value of all of intangible assets recognised as at 1 April 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of intangible assets.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2022

2.8 Inventory Valuation

- a) Raw materials and stores & spares are valued at average cost.
- b) Work-in-Progress is valued at estimated cost.
- c) Finished stocks are valued at "Lower of Cost and net Realisable Value" as prescribed by Indian Accounting Standard-2 issued by the Institute of Chartered Accountants of India except that the by product of Molasses and Bagasse has been valued at net realisable value because their cost price is not ascertainable.

2.9 Provisions, contingent liabilities and contingent assets

- a) Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When the effect of the time value of money is material, provision is measured at the present value of cash flows estimated to settle the present obligation. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.
- b) A contingent liability is not recognised in the financial statements, however, is disclosed, unless the possibility of an outflow of resources embodying economic benefits is remote. It becomes probable that an outflow of future economic benefits will be required for an item dealt with as a contingent liability, a provision is recognised in the standalone financial statements of the period (except in the extremely rare circumstances where no reliable estimate can be made).
- c) A contingent liability is not recognised in the financial statements, however, is disclosed, where an inflow of economic benefits is probable. When the realisation of income is virtually certain, then the asset is no longer a contingent asset, and is recognised as an asset.
- d) Provisions, contingent liabilities and contingent assets are reviewed at each balance sheet date.

2.10 Employee Benefits

a) Short term employee benefits:

All employee benefits falling due wholly within twelve months of rendering the services are classified as short term employee benefits, which include benefits like salaries, wages, short term compensated absences and performance incentives and are recognized as expenditure at the undiscounted value in the period in which the employee renders the related service.

b) Post-employment benefits :

Contributions to defined contribution schemes such as Provident Fund, Pension Fund etc. are recognized as expenses in the period in which the employee renders the related service in respect of certain employees, Provident Fund contributions are made to a Trust administered by the Company. The interest rate payable to the members of the Trust shall not be lower than the statutory rate of interest declared by the Central Government under the Employees Provident Funds and Miscellaneous Provisions Act, 1952 and shortfall, if any, shall be made good by the Company.

- c) In Govt. administered fund, company has no further obligations beyond its monthly contributions.

The Company's activities expose it to credit risk, liquidity risk and market risk. This note explains the sources of risks which the entity is exposed to and how it mitigates that risk.

A. Credit risk

Credit risk arises from the possibility that counter party may not be able to settle their obligations as agreed. Company is exposed to credit risk from trade receivables and deposits with banks. To manage this, Company periodically assesses the financial reliability of customers, taking into account factors such as credit track record in the market and past dealings with the Company for extension of credit to customers. Company monitors the payment track record of the customers. Outstanding customer receivables are regularly monitored. Concentrations of credit risk are limited as a result of the Company's large and diverse customer base. C. Fair value of financial assets and financial liabilities

Financial instruments measured at fair value can be divided into three levels for determining and disclosing the fair value of financial instruments by valuation technique.

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);

Level 3 – Inputs for the asset or liability that are not based on observable market data.

Following methods and assumptions are used to estimate the fair values:-

- Fair value of cash and short-term deposits, trade and other short-term receivables, trade payables, other current liabilities and short-term borrowings carried at amortised cost is not materially different from its carrying cost largely due to short-term maturities of these financial assets and liabilities.
- Financial instruments with fixed and variable interest rate fall within level 2 of the fair value hierarchy and are evaluated by Company based on parameters such as interest rate, credit rating or assessed credit worthiness.
- Non-listed shares and other securities fall within level 3 of the fair value hierarchy. Valuation is based on the net asset method.
- Fair value of the borrowing items fall within level 2 of the fair value hierarchy and is calculated on the basis of discounted future cash flows.
- Ind AS 101 allow Company to fair value Property, Plant and Equipment on transition. Company has valued property, plant and equipment as deemed cost.
 - Set out below is a comparison by class of the carrying amounts and fair value of the Company's financial instruments that are recognised in the financial statements:
