Notes to the Standalone Unaudited Financial Results for the Quarter ended June 30, 2025

1. The above financial results have been prepared in accordance with the principles and procedures of the Indian Accounting Standards ('Ind AS') notified under section 133 of the Companies Act, 2013, Companies (Indian Accounting Standards) Rules, 2015 (as amended) and relevant guidelines issued by the Securities and Exchange Board of India (SEBI).

2. In view of the seasonality of the Sugar Business, the performance results may vary from quarter to quarter.

3. The Board at its meeting held on December 10, 2024 has, subject to necessary approvals, considered and approved a Composite Scheme of Arrangement amongst Triveni Engineering & Industries Limited ('TEIL'), Sir Shadi Lal Enterprises Limited ('SSLEL') and Triveni Power Transmission Limited ('TPTL') and their respective shareholders and their respective creditors under Section 230 to 232 and other applicable provisions, if any, of the Companies Act, 2013 read with the rules made thereunder (the "Scheme") for amalgamation of SSLEL into TEIL and demerger of Power Transmission Business ('PTB') of TEIL into TPTL. The approval/no-objection of Stock Exchanges to the Scheme on the application filed by the Company is awaited.

4. The nine judges constitutional bench of the Hon'ble Supreme Court of India had in October'2024, in the case of State of Uttar Pradesh v. Lalta Prasad Vaish, held that the States have powers to regulate industrial alcohol ("Supreme Court Judgement"). Pursuant to this judgement, excise authorities of the State of Uttar Pradesh have started serving notices / demands to recover export pass fee pertaining to the period from August 25, 2018 to June 30, 2025 from the distilleries for transportation of denatured alcohol, under the Uttar Pradesh Excise Import, Export, Transport and Possession of Denatured Spirit (Twenty Fourth Amendment) Rules, 2004 ("2004 Rules"). Such action of the excise authorities has been challenged by the U.P. Sugar Mills Association on behalf of all its members by filing a writ petition before the Hon'ble High Court of Allahabad. The challenge has been made on various grounds, inter-alia on the fact that the Hon'ble High Court of Allahabad had earlier struck down the subject 2004 Rules and the special leave petition filed by the State before the Hon'ble Supreme Court was also dismissed. Consequently, 2004 Rules ceased to exist and are, therefore, not capable of automatic revival even after the Supreme Court Judgement. In view of this position of law, there exists no legislation as on date that provides the State with powers to make such demand. The impact of the aforesaid matter on the Company for the aforesaid period is ₹ 46.78 crores and in view of the legal position, the Company has presently considered it as contingent in nature.

5. The figures of the quarter ended March 31, 2025 are the balancing figures between the audited figures in respect of the full financial year and the published unaudited year to date figures till the third quarter of the financial year, which were subjected to a limited review by the Statutory Auditors of the Company.

6. The figures of the previous period under various heads have been regrouped to the extent necessary.

7. The above unaudited standalone financial results of the Company for the quarter ended June 30, 2025 have been reviewed and recommended for adoption by the Audit Committee and approved by the Board of Directors of the Company at their respective meetings held on July 29, 2025. the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material

misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system with reference to the financial statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act") as referred to in paragraph 2(f) of 'Report on Other Legal and Regulatory Requirements'

We have audited the internal financial controls with reference to financial statements of **TRIVENI POWER TRANSMISSION LIMITED** ("the Company") as of March 31, 2025 in conjunction with our audit of the financial statements of the Company for the said period ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to financial statements of the Company.

Meaning of Internal Financial Controls with reference to Financial Statements

A company's internal financial control with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2025, based on the internal control with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

(i) **Financial assets**

(a) **Classification**

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost.

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows.

(b) **Measurement**

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not measured at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

- **Amortised cost**: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is recognised using the effective interest rate method.
- **Fair value through other comprehensive income (FVTOCI)**: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVTOCI.
- **Fair value through profit or loss (FVTPL):** Assets that do not meet the criteria for amortised cost or FVTOCI are measured at fair value through profit or loss.

(c) **Impairment of financial assets**

In accordance with Ind AS 109 *Financial Instruments*, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss associated with its financial assets carried at amortised cost and FVTOCI debt instruments.

(d) **Derecognition of financial assets**

A financial asset is derecognised only when

- the Company has transferred the rights to receive cash flows from the financial asset; or
- retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

(ii) **Financial liabilities and equity instruments**

(a) **Classification**

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities.

Financial liabilities

The Company classifies its financial liabilities in the following measurement categories:

- those to be measured subsequently at fair value through profit or loss, and
- those measured at amortised cost.

Financial liabilities are classified as at FVTPL when the financial liability is held for trading or it is designated as at FVTPL, other financial liabilities are measured at amortised cost at the end of subsequent accounting periods.

(b) **Measurement**

Equity instruments

Equity instruments issued by the Company are recognised at the proceeds received. Transaction cost of equity transactions shall be accounted for as a deduction from equity.

Financial liabilities

At initial recognition, the Company measures a financial liability at its fair value net of, in the case of a financial liability not measured at fair value through profit or loss, transaction costs that are directly attributable to the issue of the financial liability. Transaction costs of financial liability carried at fair value through profit or loss are expensed in profit or loss.

Subsequent measurement of financial liabilities depends on the classification of financial liabilities. There are two measurement categories into which the Company classifies its financial liabilities:

- **Fair value through profit or loss (FVTPL):** Financial liabilities are classified as at FVTPL when the financial liability is held for trading or it is designated as at FVTPL. Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss.
- **Amortised cost**: Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

(c) **Derecognition**

Equity instruments

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

(iii) **Impairment of non-financial assets**

Non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period. When an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, so however that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

(iv) **Income tax**

The Income tax liability is provided in accordance with the provisions of the Income-tax Act, 1961. Deferred tax assets and liabilities are recognised for all temporary differences arising between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Income tax and deferred tax are measured on the basis of the tax rates and tax laws enacted or substantively enacted by the end of the reporting period and are recognised in profit or loss except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

The Company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

Note 2: Material accounting policy information

(a) **Classification**

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost.

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows.

(b) **Measurement**

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not measured at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

- **Amortised cost**: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is recognised using the effective interest rate method.
- **Fair value through other comprehensive income (FVTOCI)**: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVTOCI.
- **Fair value through profit or loss (FVTPL):** Assets that do not meet the criteria for amortised cost or FVTOCI are measured at fair value through profit or loss.

(c) **Impairment of financial assets**

In accordance with Ind AS 109 *Financial Instruments*, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss associated with its financial assets carried at amortised cost and FVTOCI debt instruments.

(d) **Derecognition of financial assets**

A financial asset is derecognised only when

- the Company has transferred the rights to receive cash flows from the financial asset; or
- retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

(ii) **Financial liabilities and equity instruments**

(a) **Classification**

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities.

Financial liabilities

The Company classifies its financial liabilities in the following measurement categories:

- those to be measured subsequently at fair value through profit or loss, and
- those measured at amortised cost.

Financial liabilities are classified as at FVTPL when the financial liability is held for trading or it is designated as at FVTPL, other financial liabilities are measured at amortised cost at the end of subsequent accounting periods.

(b) **Measurement**

Equity instruments

Equity instruments issued by the Company are recognised at the proceeds received. Transaction cost of equity transactions shall be accounted for as a deduction from equity.

Financial liabilities

At initial recognition, the Company measures a financial liability at its fair value net of, in the case of a financial liability not measured at fair value through profit or loss, transaction costs that are directly attributable to the issue of the financial liability. Transaction costs of financial liability carried at fair value through profit or loss are expensed in profit or loss.

Subsequent measurement of financial liabilities depends on the classification of financial liabilities. There are two measurement categories into which the Company classifies its financial liabilities:

- **Fair value through profit or loss (FVTPL):** Financial liabilities are classified as at FVTPL when the financial liability is held for trading or it is designated as at FVTPL. Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss.
- **Amortised cost**: Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

(c) **Derecognition**

Equity instruments

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

(iii) **Impairment of non-financial assets**

Non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period. When an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, so however that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

(iv) **Income tax**

The Income tax liability is provided in accordance with the provisions of the Income-tax Act, 1961. Deferred tax assets and liabilities are recognised for all temporary differences arising between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Income tax and deferred tax are measured on the basis of the tax rates and tax laws enacted or substantively enacted by the end of the reporting period and are recognised in profit or loss except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Interim Financial Statements give a true and fair view in conformity with the Ind AS 34 and other accounting principles generally accepted in India, of the state of affairs of the Company as at September 30, 2025, its profit including other comprehensive Income, its cash flows and the changes in equity for the six months ended on that date.

Basis for Opinion

We conducted our audit of the Interim Financial Statements in accordance with the Standards on Auditing (SAs) issued by the Institute of Chartered Accountants of India (ICAI). Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Interim Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India (ICAI), and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI'S Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Interim Financial Statements.

Responsibility of Management and Those Charged with Governance for the Interim Financial Statements

The Company's Board of Directors is responsible for the preparation of these Interim Financial Statements that give a true and fair view of the state of affairs, Profit including other comprehensive income, changes in equity and cash flows of the Company in accordance with Ind AS 34 prescribed under section 133 of the Act and other accounting principles generally accepted in India.

In preparing the Interim Financial Statements, the management and the Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of Interim Financial Statements

Our objectives are to obtain reasonable assurance about whether the Interim Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Interim Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also;

- Identify and assess the risks of material misstatement of the Interim Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Interim Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the Interim Financial Statements, including the disclosures, and whether the Interim Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Interim Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Interim Financial Statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Interim Financial Statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Triveni Power Transmission Ltd.

Note 1: Corporate information and basis of preparation

(i) Corporate information

Triveni Power Transmission Limited ("the Company") is a company limited by shares, incorporated on 4 December 2024 and domiciled in India. The Holding Company, Triveni Engineering & Industries Limited owns 100% of equity share capital of the Company. The registered office of the Company is located at A-44, Hosiery Complex, Phase II extension, Noida, Uttar Pradesh - 201305.

(ii) Basis of preparation and presentation

(a) Compliance with Ind AS

The interim financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act.

(b) Historical cost convention

The interim financial statements have been prepared on an accrual basis under historical cost convention. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

(c) Classification of assets and liabilities into current/non-current

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in Schedule III to the Act. The Company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

(d) Statement of cash flows

Cash flows are reported using the indirect method, whereby profit/loss before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and items of income or expense associated with investing or financing activities. The cash flows from operating, investing and financing activities of the Company are segregated.

Note 2: Material accounting policy information

This note provides a list of the material accounting policies adopted in the preparation of these interim financial statements. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(i) Financial assets

(a) Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost.

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows.

S.S. KOTHARI MEHTA & CO. LLP NEW DELHI Chartered Accountants

Triveni Power Transmission Ltd.

(b) **Measurement**

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not measured at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

- **Amortised cost**: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is recognised using the effective interest rate method.
- **Fair value through other comprehensive income (FVTOCI)**: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVTOCI.
- **Fair value through profit or loss (FVTPL):** Assets that do not meet the criteria for amortised cost or FVTOCI are measured at fair value through profit or loss.

(c) **Impairment of financial assets**

In accordance with Ind AS 109 *Financial Instruments*, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss associated with its financial assets carried at amortised cost and FVTOCI debt instruments.

(d) **Derecognition of financial assets**

A financial asset is derecognised only when

- the Company has transferred the rights to receive cash flows from the financial asset; or
- retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

(ii) **Financial liabilities and equity instruments**

(a) **Classification**

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities.

S.S. KOTHARI MEHTA & CO. LLP NEW DELHI Chartered Accountants

Triveni Power Transmission Ltd.

Financial liabilities

The Company classifies its financial liabilities in the following measurement categories:

- those to be measured subsequently at fair value through profit or loss, and
- those measured at amortised cost.

Financial liabilities are classified as at FVTPL when the financial liability is held for trading or it is designated as at FVTPL, other financial liabilities are measured at amortised cost at the end of subsequent accounting periods.

(b) **Measurement**

Equity instruments

Equity instruments issued by the Company are recognised at the proceeds received. Transaction cost of equity transactions shall be accounted for as a deduction from equity.

Financial liabilities

At initial recognition, the Company measures a financial liability at its fair value net of, in the case of a financial liability not measured at fair value through profit or loss, transaction costs that are directly attributable to the issue of the financial liability. Transaction costs of financial liability carried at fair value through profit or loss are expensed in profit or loss.

Subsequent measurement of financial liabilities depends on the classification of financial liabilities. There are two measurement categories into which the Company classifies its financial liabilities:

- **Fair value through profit or loss (FVTPL):** Financial liabilities are classified as at FVTPL when the financial liability is held for trading or it is designated as at FVTPL. Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss.
- **Amortised cost**: Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

(c) **Derecognition**

Equity instruments

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

S.S. KOTHARI MEHTA & CO. LLP NEW DELHI Chartered Accountants

Triveni Power Transmission Ltd.

(iii) **Impairment of non-financial assets**

Non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period. When an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, so however that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

(iv) **Income tax**

The Income tax liability is provided in accordance with the provisions of the Income-tax Act, 1961. Deferred tax assets and liabilities are recognised for all temporary differences arising between the carrying amounts of assets and liabilities in the interim financial statements and the corresponding tax bases used in the computation of taxable profit. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Income tax and deferred tax are measured on the basis of the tax rates and tax laws enacted or substantively enacted by the end of the reporting period and are recognised in profit or loss except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

SCOPE AND PURPOSE OF THIS REPORT

We understand that the Management are contemplating the following restructuring proposals:

i. Merger of SSEL into TEIL; and thereafter
ii. Demerger of PTB Undertaking into TPTL.

The Proposed Transactions will be carried out pursuant to a Composite Scheme of Arrangement, under sections 230 to 232 and other relevant provisions of the Companies Act, 2013 or any statutory modifications, re-enactment or amendments thereof for the time being in force ("the Act") read with the Companies (Compromises, Arrangements and Amalgamations) Rules, 2016 ("the Rules"), as amended from time to time and all other applicable provisions, if any, of the Act and any other applicable law for the time being in force including the applicable provisions of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 and the circulars issued therein ("the Regulations"), in each case, as amended from time to time, and in a manner provided in the Draft Composite Scheme of Arrangement (earlier defined as 'the Scheme').

We understand that as consideration for the proposed amalgamation of SSEL with TEIL, equity shares of TEIL would be issued to equity shareholders of SSEL. Further, the existing equity shares of SSEL held by TEIL would stand cancelled following the issuance of shares of TEIL.

In accordance with the provisions of the Scheme, we understand that as part of the Proposed Demerger, all assets and liabilities identified as pertaining to the PTB Undertaking shall be transferred to the Resulting Company at values as appearing in the books of Demerged Company in compliance with Section 2(19AA) and other applicable provisions of the Income Tax Act, 1961 and related rules and notifications.

As per the Scheme provided to us and based on discussions with Management, we understand that upon Proposed Demerger, transfer and vesting of the PTB Undertaking of Demerged Company into Resulting Company, the equity shares of Resulting Company will be issued to all the equity shareholders of Demerged Company. Upon allotment of the equity shares by Resulting Company to the equity shareholders of Demerged Company, it is envisaged that ~70% equity shareholding in Resulting Company would be directly owned by the equity shareholders of Demerged Company in the same proportion as their shareholding in Demerged Company as of the record date, with the remaining ~30% equity shareholding to continue being held by the Demerged Company. We further understand from the Management, that the Resulting Company was recently incorporated as a wholly owned subsidiary of the Demerged Company and has been capitalized by TEIL with a share capital of INR 6.26 crores (3,13,00,000 equity shares of face value of INR 2 each).

In this connection, TEIL and SSEL (collectively referred to as the 'Client') have appointed Finvox and SSPA under the Companies Act, 2013, to submit a joint valuation report (hereinafter referred to as 'Report') recommending the following to Audit Committee / Board of Directors of the Companies for the Proposed Transactions:

a. fair equity share exchange ratio for the Proposed Amalgamation ('Exchange Ratio'); and
b. fair equity share entitlement ratio for the Proposed Demerger ('Entitlement Ratio').

(Exchange Ratio and Entitlement Ratio have together been referred to as 'Ratios')

According to the Scheme, the appointed date for the Proposed Amalgamation shall be April 01, 2025 or such other date as may be approved by NCLT. Additionally, the appointed date for Proposed Demerger shall be the same date as the Effective Date (as defined in the Scheme) or such other date as may be mutually agreed by the Demerged Company and the Resulting Company, or such other date as may be directed by the NCLT.

We would like to emphasize that certain terms of the Proposed Transactions are stated in our report, however the detailed terms of the Proposed Transactions shall be more fully described and

CERTIFIED TO BE TRUE COPY

explained in the Scheme document to be submitted with relevant authorities in relation to the Proposed Transactions.

For the purpose of this Report, we have considered Valuation Date to be December 08, 2024 ('Valuation Date').

The scope of our services is to a) conduct a relative (and not absolute) valuation exercise as at the Valuation Date to determine the equity value of TEIL and SSEL using internationally accepted valuation methodologies as may be applicable to TEIL and SSEL and then arrive at the Exchange Ratio for the Proposed Amalgamation; and b) recommend Entitlement Ratio for the Proposed Demerger and report on the same in accordance with generally accepted professional standards including ICAI Valuation Standards, 2018 ('ICAI VS') notified by ICAI and recuirement prescribed by the regulations applicable to listed companies as prescribed by SEBI.

The Valuers have worked independently in their analysis. The Valuers have independently arrived at different values per share of TEIL and SSEL. However, to arrive at the consensus on the fair equity share exchange ratio for the Proposed Amalgamation, appropriate minor adjustments, rounding-off has been done in the values arrived at by the Valuers.

We have been provided with the limited reviewed financial statements of TEIL and SSEL for 6ME Sep24. We have taken into consideration the current market parameters in our analysis and have adjusted for additional facts made known to us till the date of our Report. The Management has informed us that there are no unusual / abnormal events in TEIL and SSEL materially impacting their operating / financial performance after September 30, 2024, until the Report Date. Further, we have been informed by the Management that to the best of their knowledge, material information regarding the business of each of the Transacting Companies has been disclosed to us.

We have relied on the above while arriving at Ratios for the Proposed Transactions.

We have been informed that:

a) With effect from the appointed date, and up to and including the effective date, there would not be any capital variation in the Transacting Companies except by mutual consent of the Board of Directors of Transacting Companies or such other events as contemplated in the Scheme.

b) Till the Proposed Transaction becomes effective, neither of the Transacting Companies would declare any dividend which are materially different from those declared in the past few years.

c) There would be no significant variation between the draft Scheme of arrangement and the final scheme approved and submitted with the relevant authorities which may have impact on the Ratios recommended in this report.

We have been informed that, in the event either of the Transacting Companies restructure their equity share capital by way of share split / consolidation / issue of bonus shares / merger / demerger / reduction of share capital before the Scheme becomes effective, the issue of shares pursuant to the Ratios recommended in this Report shall be adjusted accordingly to consider the effect of any such corporate actions.

This Report is our deliverable for the above engagement and is subject to the scope, assumptions, qualifications, exclusions, limitations and disclaimers detailed hereinafter.

As such, the Report is to be read in totality and not in parts and in conjunction with the relevant documents referred to therein.

APPROACH FOR RECOMMENDATION OF EXCHANGE RATIO:

The Proposed Amalgamation contemplates the amalgamation of SSEL with TEIL. Arriving at the Exchange Ratio for the Proposed Amalgamation would require determining the relative value of equity shares of TEIL and SSEL. These values are to be determined independently, but on a relative basis for TEIL and SSEL, without considering the effect of the Proposed Amalgamation.

Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for Proposed Amalgamation and our reasonable judgment, in an independent and bona fide manner.

The Valuation Approach adopted by Finvox and SSPA is given in Annexure 1A and 1B respectively (Annexure 1A and 1B together referred to as Annexures).

BASIS FOR RECOMMENDATION OF EXCHANGE RATIO

The basis of the amalgamation of SSEL with TEIL would have to be determined after taking into consideration all the factors and methods mentioned hereinafter. Though different values have been arrived at under each of the approaches / methods as mentioned in the Annexures, for the purpose of recommending the Exchange Ratio, it is necessary to arrive at a final value for each valuation subject. It is however important to note that in doing so, we are not attempting to arrive at the absolute equity values of TEIL and SSEL, but at their relative values to facilitate the determination of the Exchange Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approaches / methods.

The Exchange Ratio has been arrived at on the basis of a relative equity valuation of TEIL and SSEL based on the various approaches / methods explained in the Annexures and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of TEIL and SSEL, having regard to information base, key underlying assumptions and limitations.

We have independently applied approaches / methods discussed in the Annexures, as considered appropriate, and arrived at the relative value per share of TEIL and SSEL. To arrive at the consensus on the Exchange Ratio for the Proposed Amalgamation of SSEL with TEIL, suitable minor adjustments / rounding off have been done.

APPROACH FOR RECOMMENDATION OF ENTITLEMENT RATIO:

In view of the above and considering that the Demerged Company intends to hold ~30% equity stake in the Resulting Company, and the Resulting Company should issue such number of equity shares to the shareholders of the Demerged Company in proportion to their shareholding in the Demerged Company so that they own the balance ~70% equity stake in the Resulting Company, and on consideration of the relevant factors and circumstances as outlined hereinabove, the table below summarizes the Share Entitlement Ratio as recommended by us:

Particulars	Value
A. Existing number of equity shares having face value of INR 2 each and fully paid up, owned by TEIL in Resulting Company *(Source: Management)*	3,13,00,000
B. Post the Proposed Demerger, equity stake Demerged Company intends to hold in Resulting Company *(Source: Management)*	~30%
C. Expected total number of equity shares of INR 2 each of Resulting Company. This considers the existing number of equity shares of Resulting Company (as stated in A above) and the proposed equity stake corresponding to such existing equity shares (as stated in B above) ***(i.e. A/ B)***	10,43,33,333
D. Number of equity shares of Resulting Company to be issued to shareholders of Demerged Company for the balance 70% equity stake in Resulting Company pursuant to the Proposed Demerger in accordance with the Scheme ***(C - A)***	7,30,33,333
E. Total number of outstanding ordinary shares of Demerged Company *i.e. post Proposed Amalgamation.*[#]	22,03,63,020
F. Share Entitlement Ratio: Number of ordinary shares of Demerged Company for which 1 equity share of Resulting Company is proposed to be issued ***(E/D)***	3.02

[#] *The number of outstanding ordinary shares of Demerged Company has been computed based on the Exchange Ratio recommended by us, hereinafter in this Report, and the outstanding number of equity shares of TEIL and SSEL as on date. The actual number of outstanding ordinary shares of Demerged Company (post the Proposed Amalgamation) could be different considering the impact of fractional entitlements, if any, for the Proposed Demerger.*

The Entitlement Ratio has been determined based on the capital structure of Resulting Company as on the date of issuance of this Report and the proposed equity stake to be held by Demerged Company in Resulting Company pursuant to the Proposed Demerger.

In view of the above, we note that the Proposed Demerger will not have any impact on the beneficial economic interest of the shareholders of Demerged Company as the equity shareholders of Demerged Company would continue to have the same beneficial economic interest in the PTB Undertaking, now by way of indirect ~30% equity ownership of Resulting Company through Demerged Company and direct ~70% equity ownership of Resulting Company. As the proposed Demerger will not affect the beneficial economic interest of the equity shareholders of Demerged Company, valuation of Resulting Company and PTB Undertaking has no bearing on the recommended Entitlement Ratio and accordingly, we have not carried out any valuation in the instant case.

Recommendation of Exchange Ratio for the proposed amalgamation of SSEL with TEIL:

In light of the above and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above including scope, limitations and assumptions described in this report and the engagement letter, we recommend the Exchange Ratio as follows:

To the equity shareholders of SSEL

*"**100 (One Hundred)** equity shares of TEIL having a face value of INR 1 each fully paid-up shall be issued **for every 137 (One Hundred and Thirty Seven)** equity shares held in SSEL having face value of INR 10 each fully paid-up".*

Recommendation of Entitlement Ratio for the proposed demerger of the PTB Undertaking of Demerged Company into TPTL:

In light of the above, the Entitlement Ratio as indicated above is fair and reasonable considering that the Proposed Demerger will not have any impact on the economic and beneficial interest of the equity shareholders of the Demerged Company and is value neutral.

Entitlement Ratio *(rounded off)*:

"1 (One) equity share of INR 2 each fully paid up of TPTL for every 3 (Three) equity shares of INR 1 each fully paid up held in Demerged Company.

Bases and Premise of Valuation

Our valuation analysis of the equity shares of TEIL and SSEL is in conformity with the ICAI Valuation Standards, 2018 issued by the Institute of Chartered Accountants of India. The valuation of the equity shares of the Companies as on the Valuation Date is carried out in accordance with ICAI VS, considering 'relative value' base and 'going concern value' premise. Any change in the valuation base or the valuation premise would impact the valuation outcome.

Valuation Approaches

A brief explanation of each valuation approach is provided below.

Income Approach

The income approach provides an estimate of the present value of the monetary benefits expected to flow to the owners of the business. It requires the projection of the cash flows that the business is expected to generate. These cash flows are then converted to their present value by means of discounting, using a rate of return that accounts for the time value of money and the appropriate degree of risk in the investment. The value of the business is the sum of the discounted cash flows.

Market Approach

The market approach considers actual arm's-length transactions for which the market value of investments alternative to the subject company can be observed. The value of a company or an ownership interest in the company can be estimated by developing relevant multiples for the comparative companies that relate value to underlying revenue, earnings, or cash flow variable, and then applying these multiples to the comparable underlying revenue, earnings, or cash flow variable for the subject company. The value multiples can be derived from guideline public company and comparable transactions of publicly traded companies or private companies.

Cost (Asset-Based) Approach

The asset-based (net underlying assets) approach is a form of the cost approach. The values of the individual assets (i.e., current, fixed, and intangible) of the business are estimated. The sum of the individual asset values represents the total asset value of the enterprise. The enterprise's liabilities related to working capital are deducted to arrive at an indication of value for the invested capital of the business. Because the cost approach does not always reflect the full value of intangible assets, it is often not appropriate to value an operating business completely on the basis of this approach without giving weights to other valuation methods. The cost approach may be relevant to the value of an operating business that is not sufficiently profitable and whose "breakup" values may be greater than its going concern value.

Valuation Methodologies

The valuation methodology to be adopted varies from case to case depending upon different factors affecting valuation. Different methodologies are adopted for the valuation of manufacturing, investment, consultancy, and trading companies.

Though there are no thumb rules for valuation, the method to be adopted has to be appropriate to the particular purpose for which valuation is being done as well as the attendant circumstances of each case. For example, a manufacturing company is generally valued on the combination of asset

CERTIFIED TO BE TRUE COPY

value and the earning potential of the business. An investment company is valued on the basis of the value of underlying assets.

However, the value is specific to the point in time and may change with the passage of time. The value is derived in the context of an existing environment that includes economic conditions, state of industry/market and state of business activities of companies being valued etc. as of the appointed date of valuation. The basis of valuation would depend upon the purpose of valuation, the type of business, the future prospects and other attendant circumstances.

Discounted Cash Flow Method ("DCF") – Income Approach

The DCF method values the asset by discounting the cash flows expected to be generated by the asset for the explicit forecast period and also the perpetuity value (or terminal value) in the case of assets with an indefinite life. The DCF method is one of the most common methods for valuing various assets such as shares, businesses, real estate projects, debt instruments, etc. This method involves discounting of future cash flows expected to be generated by an asset over its life using an appropriate discount rate to arrive at the present value. The important inputs for the DCF method are (a) Cash flows; (b) Discount rate; and (c) Terminal value.

(a) The following are the cash flows that are used for the projections:

- Free Cash Flows to Firm ("FCFF"): FCFF refers to cash flows that are available to all the providers of capital, i.e. equity shareholders, preference shareholders and lenders. Therefore, cash flows required to service lenders and preference shareholders such as interest, dividend, repayment of principal amount and even additional fund-raising are not considered in the calculation of FCFF.

- Free Cash Flows to Equity ("FCFE"): FCFE refers to cash flows available to equity shareholders and therefore, cash flows after interest, dividend to preference shareholders, principal repayment and additional funds raised from lenders/preference shareholders are considered.

(b) Appropriate Discount Rate - Discount Rate is the return expected by a market participant from a particular investment and shall reflect not only the time value of money but also the risk inherent in the asset being valued as well as the risk inherent in achieving future cash flows. In discounting the FCFF the appropriate discount rate is the weighted average cost of capital, which results in the enterprise value of the company. Whereas, in the case of FCFE the appropriate discount rate is the cost of equity, which results in the equity value of the company.

(c) Terminal Value – It represents the present value at the end of the explicit forecast period of all subsequent cash flows to the end of the life of the asset or into perpetuity if the asset has an indefinite life. There are different methods for estimating the terminal value. The commonly used methods are:

- Gordon (Constant) Growth Model;
- Variable Growth Model; and
- Exit Multiple;

Capitalization of Free Cash Flows Method – Income Approach

The capitalization of free cash flows method is an income-based approach which is used to value a business based on future estimated free cash flow to equity or free cash flow to the firm generated

CERTIFIED TO BE TRUE COPY

by a company. The projected free cash flow is capitalized using an appropriate capitalization rate. This method expresses a relationship between the following:

- Estimated future benefits (earnings or cash flows)
- Yield (required rate of return) on either equity or total invested capital (capitalization rate)

It is important that any income or expense items generated from non-operating assets and liabilities be removed from estimated future benefits prior to applying this method. The value of net non-operating assets and liabilities is then added to the value of the business derived from the capitalization of earnings. The capitalization of FCFE/FCFF is a single period method that assumes a stable level of cash flow. This method is appropriate for valuing companies which have reached a stable stage and are expected to generate a stable level of cash flow in the future years.

Market Price Method – Market Approach

The market price of an equity share as quoted on a stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares.

Comparable Companies Multiples Method – Market Approach

This method involves reviewing valuation multiples for companies that are in the same or similar line of business as the company being valued and then applying the relevant valuation multiples to the subject company to determine its value. The theory behind this approach is that valuation measures of similar companies, as manifested through stock market valuations of listed comparable companies, should represent a good proxy for the specific company being valued. Depending on the source of data available and the underlying company being valued, a variety of valuation measures might be used including Enterprise Value ("EV") to Sales, EV to EBITDA, Price to Earnings, etc.

Comparable Transactions Multiples Method – Market Approach

This method involves reviewing transaction multiples for companies that are in the same or similar line of business as the company being valued and then applying the relevant transaction multiples to the subject company to determine its value. The transaction multiples are determined for the comparable transactions for which financial details are available in the public domain. The theory behind this approach is that valuation measures of similar companies, as manifested through market transactions (i.e. acquisition or equity funding), should represent a good proxy for the specific company being valued. Depending on the source of data available and the underlying company being valued, a variety of valuation measures might be used including Enterprise Value (EV) to Sales, EV to EBITDA, Price to Earnings, etc.

Net Assets Value Method – Cost (Asset-Based) Approach

The net asset value method is an asset-based approach to valuation where the value of the business is based on the difference between the value of the assets and liabilities of the business.

Recommendation of Fair Equity Share Exchange Ratio

The fair basis for recommending the share exchange ratio for the Draft Composite Scheme of Arrangement of TEIL and SSEL is dependent upon various factors and considerations mentioned

CERTIFIED TO BE TRUE COPY

here in this report. Though different values have been arrived at under different methods, for the purposes of recommending a ratio of exchange it is necessary to arrive at a single value for the shares of the companies. It is however important to note that in doing so, we are not attempting to arrive at the absolute values of the shares of each company. Our exercise is to work out the relative value of shares of the Companies to facilitate the determination of the fair share exchange ratio. For this purpose, it is necessary to give appropriate weightage to the values arrived at under each approach.

We have independently applied the approaches/methods discussed above, as considered appropriate, and arrived at their assessment of the relative values per equity share of the Companies. To arrive at the fair equity share exchange ratios for the Draft Composite Scheme of Arrangement, suitable minor adjustments/rounding off have been done in the relative values arrived by Finvox.

The fair equity share exchange ratio has been arrived on the basis of a relative valuation of equity shares of the Companies based on the approaches explained herein and various qualitative factors relevant to the companies and the business dynamics and growth potential of the businesses, having regard to information base, management representation and perceptions, key underlying assumptions and limitations.

In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgement taking into account all the relevant factors. There will always be several factors, e.g. present and prospective competition, yield on comparable securities and market sentiments, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share.

In light of the above and on consideration of all the relevant factors and circumstances as discussed and outlined hereinabove in this report, we recommend the following fair equity share exchange ratio for the Draft Composite Scheme of Arrangement whose computation as required as per BSE Circular number LIST/COMP/02/2017-18 dated May 29, 2017 and NSE Circular number NSE/CML/2017/12 dated June 01, 2017.

The calculation of the fair equity share exchange ratio of TEIL and SSEL is presented in the exhibit below:

Notes to Exhibit:

- Asset Approach: As of the Valuation Date, TEIL and SSEL are intended to be continued on a going concern basis and there is no intention to dispose-off the assets/business. In a going concern scenario, the earning power, as reflected under the income/market approach, is of greater importance to the basis of arrangement, with the values arrived at on the net asset basis being of limited relevance. Accordingly, the asset approach was not used for the valuation of TEIL and SSEL.

- Income Approach: Given the operating nature of the business of TEIL and of SSEL and based on the multi-year projections provided by the Management, we have applied the income approach, utilizing the discounted cash flow method to compute the enterprise value of TEIL and SSEL. We made appropriate adjustment to the enterprise value for outstanding loans, contingent liabilities, cash and cash equivalents, value of investments and other non-operating assets/liabilities, after considering the tax wherever applicable, to arrive at the equity value and fair value per share of TEIL and SSEL.

- Market Approach: The value of equity shares of TEIL and SSEL are calculated based on the market price method, using the market pricing formula given in the ICDR regulations and the comparable companies multiples method.

  (i) Market Price Method

  As previously discussed, TEIL is listed on BSE and NSE whereas, SSEL is only listed on BSE. As of the Valuation Date, the equity share of both TEIL and SSEL are frequently traded on the stock exchanges.

  According to Section 164(1) of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, ("ICDR") for issuers that have been listed on a recognized stock exchange for a period of 90 days or more as of the relevant date, the price of equity shares to be allotted pursuant to the preferential issue shall not be less than higher of the following:

  - The 90 trading days' Volume Weighted Average Price ("VWAP") of related equity shares quoted on the recognized stock exchange preceding the relevant date.

  - The 10 trading days' VWAP of related equity shares quoted on the recognized stock exchange preceding the relevant date.

  Based on the guidance given in the ICDR regulations for determining the share price, we have calculated the per share of TEIL (based on NSE) and SSEL (based on BSE) using the formula of 90 days/10 days VWAP.

  (ii) Comparable Companies Multiples Method

  In order to calculate the enterprise value of TEIL and SSEL, we used the EV/EBITDA multiples of the comparable listed companies in India. We made appropriate adjustment to the enterprise value for outstanding loans, contingent liabilities, cash and cash equivalents, value of investments and other non-operating assets/liabilities, after considering the tax wherever applicable, to arrive at the equity value and fair value per share of TEIL and SSEL.

(iii) Comparable Transactions Multiples Method

Our search for comparable transactions with a similar core business, sales size and other attributes did not yield a sufficient number of results to adequately perform this method. Accordingly, the comparable transactions multiples method was not used in our valuation of TEIL and SSEL.

VALUATION APPROACHES FOR PROPOSED AMALGAMATION

Bases and Premise of Valuation

Valuation of the equity shares of TEIL and SSEL as on the Valuation Date is carried out in accordance with ICAI VS, considering 'relative value' base and 'going concern value' premise. Any change in the valuation base, or the valuation premise could have a significant impact on the valuation outcome of the TEIL and SSEL.

The following are commonly used and accepted methods for determining the value of the equity shares of a company:

1. Cost Approach – Net Asset Value method
2. Market Approach:
    a) Market Price method
    b) Comparable Companies Multiple method
3. Income Approach – Discounted Cash Flow method

Each of the aforesaid approaches proceeds on different fundamental assumptions which have greater or lesser relevance and at times even no relevance, to a given situation. Thus, the approach to be adopted for a particular valuation exercise must be judiciously chosen.

For the Proposed Amalgamation, we have considered the following commonly used and accepted methods for determining the value of equity shares of TEIL and SSEL for the purpose of recommending Exchange Ratio to the extent relevant and applicable:

1. Cost Approach - Net Asset Value Method ('NAV')

The Cost Approach reflects the amount that would be required currently to replace the service capacity of an asset; often referred to as current replacement cost.

TEIL and SSEL

In the present case, the business of TEIL and of SSEL is intended to be continued on a 'going concern basis' and there is no intention to dispose-off the assets, therefore the Cost Approach is not adopted for the present valuation exercise.

2. Market Approach

a) Market Price ('MP') Method

The market price of an equity share as quoted on a stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares.

TEIL and SSEL

In the present case, the equity shares of TEIL are listed on both NSE and BSE whereas for SSEL is listed on BSE. The value of equity shares of TEIL and SSEL under this method is determined considering the share prices of TEIL on NSE and SSEL on BSE over an appropriate period.

CERTIFIED TO BE TRUE COPY

b) Comparable Companies' Multiple (CCM) / Comparable Transactions Multiples (CTM) Method

Under CCM method, the value of equity shares of companies is determined by using multiples derived from valuations of comparable companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for material differences, if any.

TEIL and SSEL

In the present case, the businesses of TEIL and SSEL have been valued based on Enterprise Value ('EV') to Earnings before Interest, Tax, Depreciation and Amortisation ('EBITDA') multiple of comparable listed companies to arrive at EV of TEIL and SSEL.

To the value so arrived, appropriate adjustments have been made for loan funds, contingent liabilities, cash and cash equivalents, value of investments and other assets/liabilities, after considering the tax wherever applicable to arrive at the equity value and fair value per share of TEIL and SSEL.

Under CTM, the value of shares / business of a company is determined based on market multiples of publicly disclosed transactions in the similar space as that of the subject company. Multiples are generally based on data from recent transactions in a comparable sector, but with appropriate adjustment after consideration has been given to the specific characteristics of the business being valued.

TEIL and SSEL

Based on our analysis and discussion with the Management, we understand that there are no sufficient recent comparable transactions, data of which is available in public domain, involving companies of similar nature and having a similar operating / financial metrics as that of TEIL and SSEL, we have therefore not used CTM method to value the equity shares of these companies.

3. Income Approach - Discounted Cash Flows Method ('DCF')

Under the Income Approach, equity shares of TEIL and SSEL are valued using DCF Method.

Under DCF method, the projected free cash flows from business operations, after considering fund requirements for projected capital expenditure and incremental working capital for each business, are discounted at the respective Weighted Average Cost of Capital (WACC). The sum of the discounted value of such free cash flows and discounted value of perpetuity is the value of the business.

The free cash flows represent the cash available for distribution to both the owners and the creditors of the business. The free cash flows are determined by adding back to earnings before interest and tax (i) depreciation and amortizations (non-cash charge), and (ii) any non-operating item. The cash flow is adjusted for outflows on account of (i) capital expenditure, (ii) incremental working capital requirements and (iii) tax.

WACC is considered as the most appropriate discount rate in the DCF Method, since it reflects both the business and the financial risk of the company. In other words, WACC is the weighted average of cost of equity and cost of debt of the respective companies.

To the value so arrived, appropriate adjustments have been made for loan funds, contingent liabilities, cash and cash equivalents, value of investments and other assets/liabilities, after considering the tax wherever applicable to arrive at the equity value.

As mentioned above, we have considered a combination of Market Approach and Income Approach for arriving at the relative value per equity share of TEIL and SSEL.

(b) The proposed amalgamation will create and provide operational synergies, economies of scale, optimum utilization of resources, simplification of business processes, elimination of duplication and rationalization of administrative expenses, which will lead to savings in the costs.

(c) It will help in achieving consolidation, greater integration and flexibility that will maximize overall shareholder's value and improve the competitive position and negotiating power of the combined entity.

(d) It will result in reduction of multiplicity of entities, thereby reducing compliance cost of multiple entities viz., statutory filings, regulatory compliances, labour law/ establishment related compliances.

		Company. A copy of the said Joint Valuation Report dated December 9, 2024 providing full justification and rationale in respect of the share exchange ratio and share entitlement ratio is enclosed as **Annexure M,** which may please be referred to. Further, D&A Financial Services (P) Ltd., an independent SEBI registered category I Merchant Banker in its Fairness Opinion Report, has also opined that the Share Entitlement Ratio is fair and reasonable from a financial point of view to the shareholders of Demerged Company. 16.	In case of Demerger, basis for division of assets and liabilities between divisions of Demerged entity. The demerged business is the power transmission business, i.e., "PTB" as defined in Clause 1.2.19 of the proposed Composite Scheme of Arrangement and the demerged undertaking is the "PTB Undertaking" as defined in Clause 1.2.20 of the proposed Composite Scheme of Arrangement, comprising all the assets and liabilities pertaining to the PTB, as more elaborately detailed in the proposed Composite Scheme of Arrangement.
17.	How the scheme will be beneficial to public shareholders of the Listed entity and details of change in value of public shareholders pre and post scheme of arrangement.	As mentioned in the rationale of the Scheme- 1. The proposed amalgamation of the Amalgamating Company into the Amalgamated Company will create and provide operational synergies, economies of scale, optimum utilization of resources, elimination of duplication and rationalization of administrative expenses. Further, the demerger of the PTB Undertaking into the Resulting Company would help to improve competitiveness, ability and strengthen the position of PTB in the relevant markets, resulting more sustainable growth and competitive advantage, and unlocking of value. Thus, the benefits of the Scheme, would over a longer period of time, outweigh the costs incurred towards implementation of the Scheme.

Triveni Engineering & Industries Limited ★ Noida

		2. In consideration for the amalgamation of the Amalgamating Company with the Amalgamated Company, all the members of the Amalgamating Company as on Record Date 1 shall receive equity shares of the Amalgamated Company, and the SSEL Promoter Shareholding shall get cancelled. Further, in consideration for the demerger of the PTB Undertaking into the Resulting Company, all the shareholders of the Demerged Company as on Record Date 2 shall receive equity shares of the Resulting Company in the same proportion as their holding in the Demerged Company, such that the Existing Equity Shares of the Demerged Company shall continue to be held by the Demerged Company in the Resulting Company. Therefore, the Scheme is not detrimental to the shareholders of the Company. "List of comparable companies considered for comparable companies' multiple method, if the same method is used in valuation."

As explained in the joint valuation report issued by Finvox Analytics and SSPA & Co. dated December 9, 2024 ("Joint Valuation Report"), Finvox used the comparable companies' multiple method for the valuation of Triveni Engineering and Industries Limited ("TEIL") and Sir Shadi Lal Enterprises Limited ("SSEL") for the proposed merger of SSEL with TEIL.

The list of comparable companies used by Finvox for the valuation of TEIL and SSEL is as follows.

1) Sugar and Allied Business of TEIL

- Avadh Sugar Energy Limited
- Balrampur Chini Mills Limited
- Dalmia Bharat Sugar and Industries Limited

2) Power Transmission Business of TEIL

- Shanthi Gears Limited
- Elecon Engineering Company Limited

3) Water Business of TEIL

- VA Tech Wabag Limited
- EMS Limited

4) Sir Shadi Lal Enterprises Limited

- Avadh Sugar Energy Limited
- Dhampur Bio Organics Limited
- Dhampur Sugar Mills Limited
- Dwarikesh Sugar Industries Limited
- Kesar Enterprises Limited
- KM Sugar Mills Limited
- Mawana Sugars Limited
- Rana Sugars Limited
- Uttam Sugar Mills Limited

As explained in the Joint Valuation Report, the proposed demerger of PTB Undertaking from TEIL will not have any impact on the beneficial economic interest of the shareholders of Demerged Company as the equity shareholders of Demerged Company would continue to have the same beneficial economic interest in the PTB Undertaking, now by way of indirect ~30% equity ownership of Resulting Company through Demerged Company and direct ~70% equity ownership of Resulting Company. As the proposed Demerger will not affect the beneficial economic interest of the equity shareholders of Demerged Company, valuation of Resulting Company and PTB Undertaking has no bearing on the recommended Entitlement Ratio and accordingly, We did not perform any valuation of the Demerged Undertaking and the Resultant Company.

SCOPE AND PURPOSE OF THIS REPORT

We understand that the Management are contemplating the following restructuring proposals:

i. Merger of SSEL into TEIL; and thereafter
ii. Demerger of PTB Undertaking into TPTL.

The Proposed Transactions will be carried out pursuant to a Composite Scheme of Arrangement, under sections 230 to 232 and other relevant provisions of the Companies Act, 2013 or any statutory modifications, re-enactment or amendments thereof for the time being in force ("the Act") read with the Companies (Compromises, Arrangements and Amalgamations) Rules, 2016 ("the Rules"), as amended from time to time and all other applicable provisions, if any, of the Act and any other applicable law for the time being in force including the applicable provisions of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 and the circulars issued therein ("the Regulations"), in each case, as amended from time to time, and in a manner provided in the Draft Composite Scheme of Arrangement (earlier defined as 'the Scheme').

We understand that as consideration for the proposed amalgamation of SSEL with TEIL, equity shares of TEIL would be issued to equity shareholders of SSEL. Further, the existing equity shares of SSEL held by TEIL would stand cancelled following the issuance of shares of TEIL.

In accordance with the provisions of the Scheme, we understand that as part of the Proposed Demerger, all assets and liabilities identified as pertaining to the PTB Undertaking shall be transferred to the Resulting Company at values as appearing in the books of Demerged Company in compliance with Section 2(19AA) and other applicable provisions of the Income Tax Act, 1961 and related rules and notifications.

As per the Scheme provided to us and based on discussions with Management, we understand that upon Proposed Demerger, transfer and vesting of the PTB Undertaking of Demerged Company into Resulting Company, the equity shares of Resulting Company will be issued to all the equity shareholders of Demerged Company. Upon allotment of the equity shares by Resulting Company to the equity shareholders of Demerged Company, it is envisaged that ~70% equity shareholding in Resulting Company would be directly owned by the equity shareholders of Demerged Company in the same proportion as their shareholding in Demerged Company as of the record date, with the remaining ~30% equity shareholding to continue being held by the Demerged Company. We further understand from the Management, that the Resulting Company was recently incorporated as a wholly owned subsidiary of the Demerged Company and has been capitalized by TEIL with a share capital of INR 6.26 crores (3,13,00,000 equity shares of face value of INR 2 each).

In this connection, TEIL and SSEL (collectively referred to as the 'Client') have appointed Finvox and SSPA under the Companies Act, 2013, to submit a joint valuation report (hereinafter referred to as 'Report') recommending the following to Audit Committee / Board of Directors of the Companies for the Proposed Transactions:

a. fair equity share exchange ratio for the Proposed Amalgamation ('Exchange Ratio'); and
b. fair equity share entitlement ratio for the Proposed Demerger ('Entitlement Ratio').

(Exchange Ratio and Entitlement Ratio have together been referred to as 'Ratios')

According to the Scheme, the appointed date for the Proposed Amalgamation shall be April 01, 2025 or such other date as may be approved by NCLT. Additionally, the appointed date for Proposed Demerger shall be the same date as the Effective Date (as defined in the Scheme) or such other date as may be mutually agreed by the Demerged Company and the Resulting Company, or such other date as may be directed by the NCLT.

We would like to emphasize that certain terms of the Proposed Transactions are stated in our report, however the detailed terms of the Proposed Transactions shall be more fully described and

explained in the Scheme document to be submitted with relevant authorities in relation to the Proposed Transactions.

For the purpose of this Report, we have considered Valuation Date to be December 08, 2024 ('Valuation Date').

The scope of our services is to a) conduct a relative (and not absolute) valuation exercise as at the Valuation Date to determine the equity value of TEIL and SSEL using internationally accepted valuation methodologies as may be applicable to TEIL and SSEL and then arrive at the Exchange Ratio for the Proposed Amalgamation; and b) recommend Entitlement Ratio for the Proposed Demerger and report on the same in accordance with generally accepted professional standards including ICAI Valuation Standards, 2018 ('ICAI VS') notified by ICAI and requirement prescribed by the regulations applicable to listed companies as prescribed by SEBI.

The Valuers have worked independently in their analysis. The Valuers have independently arrived at different values per share of TEIL and SSEL. However, to arrive at the consensus on the fair equity share exchange ratio for the Proposed Amalgamation, appropriate minor adjustments, rounding-off has been done in the values arrived at by the Valuers.

We have been provided with the limited reviewed financial statements of TEIL and SSEL for 6ME Sep24. We have taken into consideration the current market parameters in our analysis and have adjusted for additional facts made known to us till the date of our Report. The Management has informed us that there are no unusual / abnormal events in TEIL and SSEL materially impacting their operating / financial performance after September 30, 2024, until the Report Date. Further, we have been informed by the Management that to the best of their knowledge, material information regarding the business of each of the Transacting Companies has been disclosed to us.

We have relied on the above while arriving at Ratios for the Proposed Transactions.

We have been informed that:

a) With effect from the appointed date, and up to and including the effective date, there would not be any capital variation in the Transacting Companies except by mutual consent of the Board of Directors of Transacting Companies or such other events as contemplated in the Scheme.

b) Till the Proposed Transaction becomes effective, neither of the Transacting Companies would declare any dividend which are materially different from those declared in the past few years.

c) There would be no significant variation between the draft Scheme of arrangement and the final scheme approved and submitted with the relevant authorities which may have impact on the Ratios recommended in this report.

We have been informed that, in the event either of the Transacting Companies restructure their equity share capital by way of share split / consolidation / issue of bonus shares / merger / demerger / reduction of share capital before the Scheme becomes effective, the issue of shares pursuant to the Ratios recommended in this Report shall be adjusted accordingly to consider the effect of any such corporate actions.

APPROACH FOR RECOMMENDATION OF EXCHANGE RATIO:

The Proposed Amalgamation contemplates the amalgamation of SSEL with TEIL. Arriving at the Exchange Ratio for the Proposed Amalgamation would require determining the relative value of equity shares of TEIL and SSEL. These values are to be determined independently, but on a relative basis for TEIL and SSEL, without considering the effect of the Proposed Amalgamation.

Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for Proposed Amalgamation and our reasonable judgment, in an independent and bona fide manner.

The Valuation Approach adopted by Finvox and SSPA is given in Annexure 1A and 1B respectively (Annexure 1A and 1B together referred to as Annexures).

BASIS FOR RECOMMENDATION OF EXCHANGE RATIO

The basis of the amalgamation of SSEL with TEIL would have to be determined after taking into consideration all the factors and methods mentioned hereinafter. Though different values have been arrived at under each of the approaches / methods as mentioned in the Annexures, for the purpose of recommending the Exchange Ratio, it is necessary to arrive at a final value for each valuation subject. It is however important to note that in doing so, we are not attempting to arrive at the absolute equity values of TEIL and SSEL, but at their relative values to facilitate the determination of the Exchange Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approaches / methods.

The Exchange Ratio has been arrived at on the basis of a relative equity valuation of TEIL and SSEL based on the various approaches / methods explained in the Annexures and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of TEIL and SSEL, having regard to information base, key underlying assumptions and limitations.

We have independently applied approaches / methods discussed in the Annexures, as considered appropriate, and arrived at the relative value per share of TEIL and SSEL. To arrive at the consensus on the Exchange Ratio for the Proposed Amalgamation of SSEL with TEIL, suitable minor adjustments / rounding off have been done.

APPROACH FOR RECOMMENDATION OF ENTITLEMENT RATIO:

In view of the above and considering that the Demerged Company intends to hold ~30% equity stake in the Resulting Company, and the Resulting Company should issue such number of equity shares to the shareholders of the Demerged Company in proportion to their shareholding in the Demerged Company so that they own the balance ~70% equity stake in the Resulting Company, and on consideration of the relevant factors and circumstances as outlined hereinabove, the table below summarizes the Share Entitlement Ratio as recommended by us:

Particulars	Value
A. Existing number of equity shares having face value of INR 2 each and fully paid up, owned by TEIL in Resulting Company *(Source: Management)*	3,13,00,000
B. Post the Proposed Demerger, equity stake Demerged Company intends to hold in Resulting Company *(Source: Management)*	~30%
C. Expected total number of equity shares of INR 2 each of Resulting Company. This considers the existing number of equity shares of Resulting Company (as stated in A above) and the proposed equity stake corresponding to such existing equity shares (as stated in B above) ***(i.e. A/ B)***	10,43,33,333
D. Number of equity shares of Resulting Company to be issued to shareholders of Demerged Company for the balance 70% equity stake in Resulting Company pursuant to the Proposed Demerger in accordance with the Scheme ***(C - A)***	7,30,33,333
E. Total number of outstanding ordinary shares of Demerged Company *i.e. post Proposed Amalgamation.*[#]	22,03,63,020
F. Share Entitlement Ratio: Number of ordinary shares of Demerged Company for which 1 equity share of Resulting Company is proposed to be issued ***(E/D)***	3.02

[#] *The number of outstanding ordinary shares of Demerged Company has been computed based on the Exchange Ratio recommended by us, hereinafter in this Report, and the outstanding number of equity shares of TEIL and SSEL as on date. The actual number of outstanding ordinary shares of Demerged Company (post the Proposed Amalgamation) could be different considering the impact of fractional entitlements, if any, for the Proposed Demerger.*

The Entitlement Ratio has been determined based on the capital structure of Resulting Company as on the date of issuance of this Report and the proposed equity stake to be held by Demerged Company in Resulting Company pursuant to the Proposed Demerger.

In view of the above, we note that the Proposed Demerger will not have any impact on the beneficial economic interest of the shareholders of Demerged Company as the equity shareholders of Demerged Company would continue to have the same beneficial economic interest in the PTB Undertaking, now by way of indirect ~30% equity ownership of Resulting Company through Demerged Company and direct ~70% equity ownership of Resulting Company. As the proposed Demerger will not affect the beneficial economic interest of the equity shareholders of Demerged Company, valuation of Resulting Company and PTB Undertaking has no bearing on the recommended Entitlement Ratio and accordingly, we have not carried out any valuation in the instant case.

Accordingly, the valuation under the valuation approaches mentioned in the format prescribed under BSE Circular No. LIST/COMP/02/2017-18 dated 29 May 2017 and NSE Circular No. NSE/CML/2017/12 dated 01 June 2017 are not applicable in the given case.

Recommendation of Exchange Ratio for the proposed amalgamation of SSEL with TEIL:

In light of the above and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above including scope, limitations and assumptions described in this report and the engagement letter, we recommend the Exchange Ratio as follows:

To the equity shareholders of SSEL

*"**100 (One Hundred)** equity shares of TEIL having a face value of INR 1 each fully paid-up shall be issued **for every 137 (One Hundred and Thirty Seven)** equity shares held in SSEL having face value of INR 10 each fully paid-up".*

Recommendation of Entitlement Ratio for the proposed demerger of the PTB Undertaking of Demerged Company into TPTL:

In light of the above, the Entitlement Ratio as indicated above is fair and reasonable considering that the Proposed Demerger will not have any impact on the economic and beneficial interest of the equity shareholders of the Demerged Company and is value neutral.

Entitlement Ratio *(rounded off)*:

"1 (One) equity share of INR 2 each fully paid up of TPTL for every 3 (Three) equity shares of INR 1 each fully paid up held in Demerged Company.

Annexure IA – Valuation Workings: Finvox Analytics

Bases and Premise of Valuation

Our valuation analysis of the equity shares of TEIL and SSEL is in conformity with the ICAI Valuation Standards, 2018 issued by the Institute of Chartered Accountants of India. The valuation of the equity shares of the Companies as on the Valuation Date is carried out in accordance with ICAI VS, considering 'relative value' base and 'going concern value' premise. Any change in the valuation base or the valuation premise would impact the valuation outcome.

Valuation Approaches

A brief explanation of each valuation approach is provided below.

Income Approach

The income approach provides an estimate of the present value of the monetary benefits expected to flow to the owners of the business. It requires the projection of the cash flows that the business is expected to generate. These cash flows are then converted to their present value by means of discounting, using a rate of return that accounts for the time value of money and the appropriate degree of risk in the investment. The value of the business is the sum of the discounted cash flows.

Market Approach

The market approach considers actual arm's-length transactions for which the market value of investments alternative to the subject company can be observed. The value of a company or an ownership interest in the company can be estimated by developing relevant multiples for the comparative companies that relate value to underlying revenue, earnings, or cash flow variable, and then applying these multiples to the comparable underlying revenue, earnings, or cash flow variable for the subject company. The value multiples can be derived from guideline public company and comparable transactions of publicly traded companies or private companies.

Cost (Asset-Based) Approach

The asset-based (net underlying assets) approach is a form of the cost approach. The values of the individual assets (i.e., current, fixed, and intangible) of the business are estimated. The sum of the individual asset values represents the total asset value of the enterprise. The enterprise's liabilities related to working capital are deducted to arrive at an indication of value for the invested capital of the business. Because the cost approach does not always reflect the full value of intangible assets, it is often not appropriate to value an operating business completely on the basis of this approach without giving weights to other valuation methods. The cost approach may be relevant to the value of an operating business that is not sufficiently profitable and whose "breakup" values may be greater than its going concern value.

Valuation Methodologies

The valuation methodology to be adopted varies from case to case depending upon different factors affecting valuation. Different methodologies are adopted for the valuation of manufacturing, investment, consultancy, and trading companies.

Though there are no thumb rules for valuation, the method to be adopted has to be appropriate to the particular purpose for which valuation is being done as well as the attendant circumstances of each case. For example, a manufacturing company is generally valued on the combination of asset

value and the earning potential of the business. An investment company is valued on the basis of the value of underlying assets.

However, the value is specific to the point in time and may change with the passage of time. The value is derived in the context of an existing environment that includes economic conditions, state of industry/market and state of business activities of companies being valued etc. as of the appointed date of valuation. The basis of valuation would depend upon the purpose of valuation, the type of business, the future prospects and other attendant circumstances.

Discounted Cash Flow Method ("DCF") – Income Approach

The DCF method values the asset by discounting the cash flows expected to be generated by the asset for the explicit forecast period and also the perpetuity value (or terminal value) in the case of assets with an indefinite life. The DCF method is one of the most common methods for valuing various assets such as shares, businesses, real estate projects, debt instruments, etc. This method involves discounting of future cash flows expected to be generated by an asset over its life using an appropriate discount rate to arrive at the present value. The important inputs for the DCF method are (a) Cash flows; (b) Discount rate; and (c) Terminal value.

(a) The following are the cash flows that are used for the projections:

- Free Cash Flows to Firm ("FCFF"): FCFF refers to cash flows that are available to all the providers of capital, i.e. equity shareholders, preference shareholders and lenders. Therefore, cash flows required to service lenders and preference shareholders such as interest, dividend, repayment of principal amount and even additional fund-raising are not considered in the calculation of FCFF.
- Free Cash Flows to Equity ("FCFE"): FCFE refers to cash flows available to equity shareholders and therefore, cash flows after interest, dividend to preference shareholders, principal repayment and additional funds raised from lenders/preference shareholders are considered.

(b) Appropriate Discount Rate - Discount Rate is the return expected by a market participant from a particular investment and shall reflect not only the time value of money but also the risk inherent in the asset being valued as well as the risk inherent in achieving future cash flows. In discounting the FCFF the appropriate discount rate is the weighted average cost of capital, which results in the enterprise value of the company. Whereas, in the case of FCFE the appropriate discount rate is the cost of equity, which results in the equity value of the company.

(c) Terminal Value – It represents the present value at the end of the explicit forecast period of all subsequent cash flows to the end of the life of the asset or into perpetuity if the asset has an indefinite life. There are different methods for estimating the terminal value. The commonly used methods are:

- Gordon (Constant) Growth Model;
- Variable Growth Model; and
- Exit Multiple;

Capitalization of Free Cash Flows Method – Income Approach

The capitalization of free cash flows method is an income-based approach which is used to value a business based on future estimated free cash flow to equity or free cash flow to the firm generated

by a company. The projected free cash flow is capitalized using an appropriate capitalization rate. This method expresses a relationship between the following:

- Estimated future benefits (earnings or cash flows)
- Yield (required rate of return) on either equity or total invested capital (capitalization rate)

It is important that any income or expense items generated from non-operating assets and liabilities be removed from estimated future benefits prior to applying this method. The value of net non-operating assets and liabilities is then added to the value of the business derived from the capitalization of earnings. The capitalization of FCFE/FCFF is a single period method that assumes a stable level of cash flow. This method is appropriate for valuing companies which have reached a stable stage and are expected to generate a stable level of cash flow in the future years.

Market Price Method – Market Approach

The market price of an equity share as quoted on a stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares.

Comparable Companies Multiples Method – Market Approach

This method involves reviewing valuation multiples for companies that are in the same or similar line of business as the company being valued and then applying the relevant valuation multiples to the subject company to determine its value. The theory behind this approach is that valuation measures of similar companies, as manifested through stock market valuations of listed comparable companies, should represent a good proxy for the specific company being valued. Depending on the source of data available and the underlying company being valued, a variety of valuation measures might be used including Enterprise Value ("EV") to Sales, EV to EBITDA, Price to Earnings, etc.

Comparable Transactions Multiples Method – Market Approach

This method involves reviewing transaction multiples for companies that are in the same or similar line of business as the company being valued and then applying the relevant transaction multiples to the subject company to determine its value. The transaction multiples are determined for the comparable transactions for which financial details are available in the public domain. The theory behind this approach is that valuation measures of similar companies, as manifested through market transactions (i.e. acquisition or equity funding), should represent a good proxy for the specific company being valued. Depending on the source of data available and the underlying company being valued, a variety of valuation measures might be used including Enterprise Value (EV) to Sales, EV to EBITDA, Price to Earnings, etc.

Net Assets Value Method – Cost (Asset-Based) Approach

The net asset value method is an asset-based approach to valuation where the value of the business is based on the difference between the value of the assets and liabilities of the business.

Recommendation of Fair Equity Share Exchange Ratio

The fair basis for recommending the share exchange ratio for the Draft Composite Scheme of Arrangement of TEIL and SSEL is dependent upon various factors and considerations mentioned

here in this report. Though different values have been arrived at under different methods, for the purposes of recommending a ratio of exchange it is necessary to arrive at a single value for the shares of the companies. It is however important to note that in doing so, we are not attempting to arrive at the absolute values of the shares of each company. Our exercise is to work out the relative value of shares of the Companies to facilitate the determination of the fair share exchange ratio. For this purpose, it is necessary to give appropriate weightage to the values arrived at under each approach.

We have independently applied the approaches/methods discussed above, as considered appropriate, and arrived at their assessment of the relative values per equity share of the Companies. To arrive at the fair equity share exchange ratios for the Draft Composite Scheme of Arrangement, suitable minor adjustments/rounding off have been done in the relative values arrived by Finvox.

The fair equity share exchange ratio has been arrived on the basis of a relative valuation of equity shares of the Companies based on the approaches explained herein and various qualitative factors relevant to the companies and the business dynamics and growth potential of the businesses, having regard to information base, management representation and perceptions, key underlying assumptions and limitations.

In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgement taking into account all the relevant factors. There will always be several factors, e.g. present and prospective competition, yield on comparable securities and market sentiments, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share.

In light of the above and on consideration of all the relevant factors and circumstances as discussed and outlined hereinabove in this report, we recommend the following fair equity share exchange ratio for the Draft Composite Scheme of Arrangement whose computation as required as per BSE Circular number LIST/COMP/02/2017-18 dated May 29, 2017 and NSE Circular number NSE/CML/2017/12 dated June 01, 2017.

The calculation of the fair equity share exchange ratio of TEIL and SSEL is presented in the exhibit below:

Notes to Exhibit:

- Asset Approach: As of the Valuation Date, TEIL and SSEL are intended to be continued on a going concern basis and there is no intention to dispose-off the assets/business. In a going concern scenario, the earning power, as reflected under the income/market approach, is of greater importance to the basis of arrangement, with the values arrived at on the net asset basis being of limited relevance. Accordingly, the asset approach was not used for the valuation of TEIL and SSEL.

- Income Approach: Given the operating nature of the business of TEIL and of SSEL and based on the multi-year projections provided by the Management, we have applied the income approach, utilizing the discounted cash flow method to compute the enterprise value of TEIL and SSEL. We made appropriate adjustment to the enterprise value for outstanding loans, contingent liabilities, cash and cash equivalents, value of investments and other non-operating assets/liabilities, after considering the tax wherever applicable, to arrive at the equity value and fair value per share of TEIL and SSEL.

- Market Approach: The value of equity shares of TEIL and SSEL are calculated based on the market price method, using the market pricing formula given in the ICDR regulations and the comparable companies multiples method.

  (i) Market Price Method

  As previously discussed, TEIL is listed on BSE and NSE whereas, SSEL is only listed on BSE. As of the Valuation Date, the equity share of both TEIL and SSEL are frequently traded on the stock exchanges.

  According to Section 164(1) of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, ("ICDR") for issuers that have been listed on a recognized stock exchange for a period of 90 days or more as of the relevant date, the price of equity shares to be allotted pursuant to the preferential issue shall not be less than higher of the following:

  - The 90 trading days' Volume Weighted Average Price ("VWAP") of related equity shares quoted on the recognized stock exchange preceding the relevant date.

  - The 10 trading days' VWAP of related equity shares quoted on the recognized stock exchange preceding the relevant date.

  Based on the guidance given in the ICDR regulations for determining the share price, we have calculated the per share of TEIL (based on NSE) and SSEL (based on BSE) using the formula of 90 days/10 days VWAP.

  (ii) Comparable Companies Multiples Method

  In order to calculate the enterprise value of TEIL and SSEL, we used the EV/EBITDA multiples of the comparable listed companies in India. We made appropriate adjustment to the enterprise value for outstanding loans, contingent liabilities, cash and cash equivalents, value of investments and other non-operating assets/liabilities, after considering the tax wherever applicable, to arrive at the equity value and fair value per share of TEIL and SSEL.

(iii) Comparable Transactions Multiples Method

Our search for comparable transactions with a similar core business, sales size and other attributes did not yield a sufficient number of results to adequately perform this method. Accordingly, the comparable transactions multiples method was not used in our valuation of TEIL and SSEL.

Annexure IIA - Valuation Workings - SSPA:

VALUATION APPROACHES FOR PROPOSED AMALGAMATION

Bases and Premise of Valuation

Valuation of the equity shares of TEIL and SSEL as on the Valuation Date is carried out in accordance with ICAI VS, considering 'relative value' base and 'going concern value' premise. Any change in the valuation base, or the valuation premise could have a significant impact on the valuation outcome of the TEIL and SSEL.

The following are commonly used and accepted methods for determining the value of the equity shares of a company:

1. Cost Approach – Net Asset Value method
2. Market Approach:
    a) Market Price method
    b) Comparable Companies Multiple method
3. Income Approach – Discounted Cash Flow method

Each of the aforesaid approaches proceeds on different fundamental assumptions which have greater or lesser relevance and at times even no relevance, to a given situation. Thus, the approach to be adopted for a particular valuation exercise must be judiciously chosen.

For the Proposed Amalgamation, we have considered the following commonly used and accepted methods for determining the value of equity shares of TEIL and SSEL for the purpose of recommending Exchange Ratio to the extent relevant and applicable:

1. Cost Approach - Net Asset Value Method ('NAV')

The Cost Approach reflects the amount that would be required currently to replace the service capacity of an asset; often referred to as current replacement cost.

TEIL and SSEL

In the present case, the business of TEIL and of SSEL is intended to be continued on a 'going concern basis' and there is no intention to dispose-off the assets, therefore the Cost Approach is not adopted for the present valuation exercise.

2. Market Approach

a) Market Price ('MP') Method

The market price of an equity share as quoted on a stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares.

TEIL and SSEL

In the present case, the equity shares of TEIL are listed on both NSE and BSE whereas for SSEL is listed on BSE. The value of equity shares of TEIL and SSEL under this method is determined considering the share prices of TEIL on NSE and SSEL on BSE over an appropriate period.

b) Comparable Companies' Multiple (CCM) / Comparable Transactions Multiples (CTM) Method

Under CCM method, the value of equity shares of companies is determined by using multiples derived from valuations of comparable companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for material differences, if any.

TEIL and SSEL

In the present case, the businesses of TEIL and SSEL have been valued based on Enterprise Value ('EV') to Earnings before Interest, Tax, Depreciation and Amortisation ('EBITDA') multiple of comparable listed companies to arrive at EV of TEIL and SSEL.

To the value so arrived, appropriate adjustments have been made for loan funds, contingent liabilities, cash and cash equivalents, value of investments and other assets/liabilities, after considering the tax wherever applicable to arrive at the equity value and fair value per share of TEIL and SSEL.

Under CTM, the value of shares / business of a company is determined based on market multiples of publicly disclosed transactions in the similar space as that of the subject company. Multiples are generally based on data from recent transactions in a comparable sector, but with appropriate adjustment after consideration has been given to the specific characteristics of the business being valued.

TEIL and SSEL

Based on our analysis and discussion with the Management, we understand that there are no sufficient recent comparable transactions, data of which is available in public domain, involving companies of similar nature and having a similar operating / financial metrics as that of TEIL and SSEL, we have therefore not used CTM method to value the equity shares of these companies.

3. Income Approach - Discounted Cash Flows Method ('DCF')

Under the Income Approach, equity shares of TEIL and SSEL are valued using DCF Method.

Under DCF method, the projected free cash flows from business operations, after considering fund requirements for projected capital expenditure and incremental working capital for each business, are discounted at the respective Weighted Average Cost of Capital (WACC). The sum of the discounted value of such free cash flows and discounted value of perpetuity is the value of the business.

The free cash flows represent the cash available for distribution to both the owners and the creditors of the business. The free cash flows are determined by adding back to earnings before interest and tax (i) depreciation and amortizations (non-cash charge), and (ii) any non-operating item. The cash flow is adjusted for outflows on account of (i) capital expenditure, (ii) incremental working capital requirements and (iii) tax.

WACC is considered as the most appropriate discount rate in the DCF Method, since it reflects both the business and the financial risk of the company. In other words, WACC is the weighted average of cost of equity and cost of debt of the respective companies.

To the value so arrived, appropriate adjustments have been made for loan funds, contingent liabilities, cash and cash equivalents, value of investments and other assets/liabilities, after considering the tax wherever applicable to arrive at the equity value.

As mentioned above, we have considered a combination of Market Approach and Income Approach for arriving at the relative value per equity share of TEIL and SSEL.

Exchange Ratio:

Valuation Approach	TEIL		SSEL	
	Value per Share (INR)	Weights	Value per Share (INR)	Weights
Asset/Cost Approach*	NA	NA	NA	NA
Income Approach				
- DCF Method	460.57	50%	337.47	50%
Market Approach				
- MP Method	460.16	25%	365.63	25%
- CCM Method	454.58	25%	301.91	25%
Relative value per share	**458.97**		**335.62**	
Exchange Ratio *(rounded off)*	**100 : 137**			

NA = Not Applied / Applicable

** Since, the businesses of TEIL and SSEL are both intended to be continued on a 'going concern basis' and there is no intention to dispose-off the assets, therefore the 'Asset' approach is not adopted for the present valuation exercise.*

3. RATIONALE OF THE SCHEME

(a) Both the Amalgamating Company and the Amalgamated Company have manufacturing verticals of sugar and distillery; therefore, the proposed amalgamation of the Amalgamating Company into the Amalgamated Company would lead to the consolidation of all operations pertaining to the manufacture of the sugar, alcohol, ethanol in one entity.

(b) The proposed amalgamation will create and provide operational synergies, economies of scale, optimum utilization of resources, simplification of business processes, elimination of duplication and rationalization of administrative expenses, which will lead to savings in the costs.

(c) It will help in achieving consolidation, greater integration and flexibility that will maximize overall shareholder's value and improve the competitive position and negotiating power of the combined entity.

(d) It will result in reduction of multiplicity of entities, thereby reducing compliance cost of multiple entities viz., statutory filings, regulatory compliances, labour law/ establishment related compliances.

(e) Further, the demerger of the PTB Undertaking of the Demerged Company into the Resulting Company, pursuant to this Scheme shall be in the interest of all concerned stakeholders including shareholders, customers, creditors, employees and general public, in the following ways:

(i) The PTB and the Residual Business (*as defined in the Scheme*) address different market segments with unique opportunities and dynamics in terms of business strategy, customer set, geographic focus, competition, capabilities set, talent needs and distinct capital requirements. The transfer of the PTB Undertaking into the Resulting Company will enable each business to sharpen its focus and organize its activities and resources to improve its offerings to their respective customers. This would help to improve its competitiveness, operational efficiency, agility and strengthen its position in relevant markets resulting in more sustainable growth and competitive advantage.

D AND A FINANCIAL SERVICES PRIVATE LIMITED NEW DELHI

Triveni Engineering & Industries Limited Noida

(ii) PTB has attained a significant size, scale and has a large headroom for growth in its market. As PTB is entering the next phase of growth, the transfer and vesting of the PTB Undertaking into the Resulting Company pursuant to this Scheme would result in focused management attention and efficient administration to maximize its potential.

(iii) Further, as PTB has separate growth trajectories, risk profile and capital requirement, the segregation of the PTB Undertaking and the Residual Business will enable independent value discovery and lead to unlocking of value for each business.

The increase in EBITDA margin is on account of change in ownership and management of SSEL in FY 2024-25, revival efforts put in by the new management and promoters, plugging the inefficiencies of earlier operations, and thereafter the expected revenue growth and economies of scale from FY 2025-26 onwards.

As explained in the Joint Valuation Report, the proposed demerger of PTB Undertaking from TEIL will not have any impact on the beneficial economic interest of the shareholders of Demerged Company as the equity shareholders of Demerged Company would continue to have the same beneficial economic interest in the PTB Undertaking, now by way of indirect ~30% equity ownership of Resulting Company through Demerged Company and direct ~70% equity ownership of Resulting Company. As the proposed Demerger will not affect the beneficial economic interest of the equity shareholders of Demerged Company, valuation of Resulting Company and PTB Undertaking has no bearing on the recommended Entitlement Ratio and accordingly, We did not perform any valuation of the Demerged Undertaking and the Resultant Company.

As mentioned in the rationale of the Scheme – 1. The proposed amalgamation of the Amalgamating Company into the Amalgamated Company will create and provide operational synergies, economies of scale, optimum utilization of resources, elimination of duplication and rationalization of administrative expenses. Further, the demerger of the PTB Undertaking into the Resulting Company would help to improve competitiveness, ability and strengthen the position of PTB in the relevant markets, resulting more sustainable growth and competitive advantage, and unlocking of value. Thus, the benefits of the Scheme, would over a longer period of time, outweigh the costs incurred towards implementation of the Scheme.

		2. In consideration for the amalgamation of the Amalgamating Company with the Amalgamated Company, all the members of the Amalgamating Company as on Record Date 1 shall receive equity shares of the Amalgamated Company, and the SSEL Promoter Shareholding shall get cancelled. Further, in consideration for the demerger of the PTB Undertaking into the Resulting Company, all the shareholders of the Demerged Company as on Record Date 2 shall receive equity shares of the Resulting Company in the same proportion as their holding in the Demerged Company, such that the Existing Equity Shares of the Demerged Company shall continue to be held by the Demerged Company in the Resulting Company. Therefore, the Scheme is not detrimental to the shareholders of the Company. "List of comparable companies considered for comparable companies' multiple method, if the same method is used in valuation."

As explained in the joint valuation report issued by Finvox Analytics and SSPA & Co. dated December 9, 2024 ("Joint Valuation Report"), Finvox used the comparable companies' multiple method for the valuation of Triveni Engineering and Industries Limited ("TEIL") and Sir Shadi Lal Enterprises Limited ("SSEL") for the proposed merger of SSEL with TEIL.

The list of comparable companies used by Finvox for the valuation of TEIL and SSEL is as follows.

1) Sugar and Allied Business of TEIL

- Avadh Sugar Energy Limited
- Balrampur Chini Mills Limited
- Dalmia Bharat Sugar and Industries Limited

2) Power Transmission Business of TEIL

- Shanthi Gears Limited
- Elecon Engineering Company Limited

3) Water Business of TEIL

- VA Tech Wabag Limited
- EMS Limited

4) Sir Shadi Lal Enterprises Limited

- Avadh Sugar Energy Limited
- Dhampur Bio Organics Limited
- Dhampur Sugar Mills Limited
- Dwarikesh Sugar Industries Limited
- Kesar Enterprises Limited
- KM Sugar Mills Limited
- Mawana Sugars Limited
- Rana Sugars Limited
- Uttam Sugar Mills Limited

As explained in the Joint Valuation Report, the proposed demerger of PTB Undertaking from TEIL will not have any impact on the beneficial economic interest of the shareholders of Demerged Company as the equity shareholders of Demerged Company would continue to have the same beneficial economic interest in the PTB Undertaking, now by way of indirect ~30% equity ownership of Resulting Company through Demerged Company and direct ~70% equity ownership of Resulting Company. As the proposed Demerger will not affect the beneficial economic interest of the equity shareholders of Demerged Company, valuation of Resulting Company and PTB Undertaking has no bearing on the recommended Entitlement Ratio and accordingly, We did not perform any valuation of the Demerged Undertaking and the Resultant Company.

SCOPE AND PURPOSE OF THIS REPORT

We understand that the Management are contemplating the following restructuring proposals:

i. Merger of SSEL into TEIL; and thereafter
ii. Demerger of PTB Undertaking into TPTL.

The Proposed Transactions will be carried out pursuant to a Composite Scheme of Arrangement, under sections 230 to 232 and other relevant provisions of the Companies Act, 2013 or any statutory modifications, re-enactment or amendments thereof for the time being in force ("the Act") read with the Companies (Compromises, Arrangements and Amalgamations) Rules, 2016 ("the Rules"), as amended from time to time and all other applicable provisions, if any, of the Act and any other applicable law for the time being in force including the applicable provisions of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 and the circulars issued therein ("the Regulations"), in each case, as amended from time to time, and in a manner provided in the Draft Composite Scheme of Arrangement (earlier defined as 'the Scheme').

We understand that as consideration for the proposed amalgamation of SSEL with TEIL, equity shares of TEIL would be issued to equity shareholders of SSEL. Further, the existing equity shares of SSEL held by TEIL would stand cancelled following the issuance of shares of TEIL.

In accordance with the provisions of the Scheme, we understand that as part of the Proposed Demerger, all assets and liabilities identified as pertaining to the PTB Undertaking shall be transferred to the Resulting Company at values as appearing in the books of Demerged Company in compliance with Section 2(19AA) and other applicable provisions of the Income Tax Act, 1961 and related rules and notifications.

As per the Scheme provided to us and based on discussions with Management, we understand that upon Proposed Demerger, transfer and vesting of the PTB Undertaking of Demerged Company into Resulting Company, the equity shares of Resulting Company will be issued to all the equity shareholders of Demerged Company. Upon allotment of the equity shares by Resulting Company to the equity shareholders of Demerged Company, it is envisaged that ~70% equity shareholding in Resulting Company would be directly owned by the equity shareholders of Demerged Company in the same proportion as their shareholding in Demerged Company as of the record date, with the remaining ~30% equity shareholding to continue being held by the Demerged Company. We further understand from the Management, that the Resulting Company was recently incorporated as a wholly owned subsidiary of the Demerged Company and has been capitalized by TEIL with a share capital of INR 6.26 crores (3,13,00,000 equity shares of face value of INR 2 each).

In this connection, TEIL and SSEL (collectively referred to as the 'Client') have appointed Finvox and SSPA under the Companies Act, 2013, to submit a joint valuation report (hereinafter referred to as 'Report') recommending the following to Audit Committee / Board of Directors of the Companies for the Proposed Transactions:

a. fair equity share exchange ratio for the Proposed Amalgamation ('Exchange Ratio'); and
b. fair equity share entitlement ratio for the Proposed Demerger ('Entitlement Ratio').

(Exchange Ratio and Entitlement Ratio have together been referred to as 'Ratios')

According to the Scheme, the appointed date for the Proposed Amalgamation shall be April 01, 2025 or such other date as may be approved by NCLT. Additionally, the appointed date for Proposed Demerger shall be the same date as the Effective Date (as defined in the Scheme) or such other date as may be mutually agreed by the Demerged Company and the Resulting Company, or such other date as may be directed by the NCLT.

We would like to emphasize that certain terms of the Proposed Transactions are stated in our report, however the detailed terms of the Proposed Transactions shall be more fully described and

explained in the Scheme document to be submitted with relevant authorities in relation to the Proposed Transactions.

For the purpose of this Report, we have considered Valuation Date to be December 08, 2024 ('Valuation Date').

The scope of our services is to a) conduct a relative (and not absolute) valuation exercise as at the Valuation Date to determine the equity value of TEIL and SSEL using internationally accepted valuation methodologies as may be applicable to TEIL and SSEL and then arrive at the Exchange Ratio for the Proposed Amalgamation; and b) recommend Entitlement Ratio for the Proposed Demerger and report on the same in accordance with generally accepted professional standards including ICAI Valuation Standards, 2018 ('ICAI VS') notified by ICAI and requirement prescribed by the regulations applicable to listed companies as prescribed by SEBI.

The Valuers have worked independently in their analysis. The Valuers have independently arrived at different values per share of TEIL and SSEL. However, to arrive at the consensus on the fair equity share exchange ratio for the Proposed Amalgamation, appropriate minor adjustments, rounding-off has been done in the values arrived at by the Valuers.

We have been provided with the limited reviewed financial statements of TEIL and SSEL for 6ME Sep24. We have taken into consideration the current market parameters in our analysis and have adjusted for additional facts made known to us till the date of our Report. The Management has informed us that there are no unusual / abnormal events in TEIL and SSEL materially impacting their operating / financial performance after September 30, 2024, until the Report Date. Further, we have been informed by the Management that to the best of their knowledge, material information regarding the business of each of the Transacting Companies has been disclosed to us.

We have relied on the above while arriving at Ratios for the Proposed Transactions.

We have been informed that:

a) With effect from the appointed date, and up to and including the effective date, there would not be any capital variation in the Transacting Companies except by mutual consent of the Board of Directors of Transacting Companies or such other events as contemplated in the Scheme.

b) Till the Proposed Transaction becomes effective, neither of the Transacting Companies would declare any dividend which are materially different from those declared in the past few years.

c) There would be no significant variation between the draft Scheme of arrangement and the final scheme approved and submitted with the relevant authorities which may have impact on the Ratios recommended in this report.

We have been informed that, in the event either of the Transacting Companies restructure their equity share capital by way of share split / consolidation / issue of bonus shares / merger / demerger / reduction of share capital before the Scheme becomes effective, the issue of shares pursuant to the Ratios recommended in this Report shall be adjusted accordingly to consider the effect of any such corporate actions.

This Report is our deliverable for the above engagement and is subject to the scope, assumptions, qualifications, exclusions, limitations and disclaimers detailed hereinafter.

As such, the Report is to be read in totality and not in parts and in conjunction with the relevant documents referred to therein.

APPROACH FOR RECOMMENDATION OF EXCHANGE RATIO:

The Proposed Amalgamation contemplates the amalgamation of SSEL with TEIL. Arriving at the Exchange Ratio for the Proposed Amalgamation would require determining the relative value of equity shares of TEIL and SSEL. These values are to be determined independently, but on a relative basis for TEIL and SSEL, without considering the effect of the Proposed Amalgamation.

Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for Proposed Amalgamation and our reasonable judgment, in an independent and bona fide manner.

The Valuation Approach adopted by Finvox and SSPA is given in Annexure 1A and 1B respectively (Annexure 1A and 1B together referred to as Annexures).

BASIS FOR RECOMMENDATION OF EXCHANGE RATIO

The basis of the amalgamation of SSEL with TEIL would have to be determined after taking into consideration all the factors and methods mentioned hereinafter. Though different values have been arrived at under each of the approaches / methods as mentioned in the Annexures, for the purpose of recommending the Exchange Ratio, it is necessary to arrive at a final value for each valuation subject. It is however important to note that in doing so, we are not attempting to arrive at the absolute equity values of TEIL and SSEL, but at their relative values to facilitate the determination of the Exchange Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approaches / methods.

The Exchange Ratio has been arrived at on the basis of a relative equity valuation of TEIL and SSEL based on the various approaches / methods explained in the Annexures and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of TEIL and SSEL, having regard to information base, key underlying assumptions and limitations.

We have independently applied approaches / methods discussed in the Annexures, as considered appropriate, and arrived at the relative value per share of TEIL and SSEL. To arrive at the consensus on the Exchange Ratio for the Proposed Amalgamation of SSEL with TEIL, suitable minor adjustments / rounding off have been done.

APPROACH FOR RECOMMENDATION OF ENTITLEMENT RATIO:

In view of the above and considering that the Demerged Company intends to hold ~30% equity stake in the Resulting Company, and the Resulting Company should issue such number of equity shares to the shareholders of the Demerged Company in proportion to their shareholding in the Demerged Company so that they own the balance ~70% equity stake in the Resulting Company, and on consideration of the relevant factors and circumstances as outlined hereinabove, the table below summarizes the Share Entitlement Ratio as recommended by us:

Particulars	Value
A. Existing number of equity shares having face value of INR 2 each and fully paid up, owned by TEIL in Resulting Company *(Source: Management)*	3,13,00,000
B. Post the Proposed Demerger, equity stake Demerged Company intends to hold in Resulting Company *(Source: Management)*	~30%
C. Expected total number of equity shares of INR 2 each of Resulting Company. This considers the existing number of equity shares of Resulting Company (as stated in A above) and the proposed equity stake corresponding to such existing equity shares (as stated in B above) ***(i.e. A/ B)***	10,43,33,333
D. Number of equity shares of Resulting Company to be issued to shareholders of Demerged Company for the balance 70% equity stake in Resulting Company pursuant to the Proposed Demerger in accordance with the Scheme ***(C - A)***	7,30,33,333
E. Total number of outstanding ordinary shares of Demerged Company *i.e. post Proposed Amalgamation.*[#]	22,03,63,020
F. Share Entitlement Ratio: Number of ordinary shares of Demerged Company for which 1 equity share of Resulting Company is proposed to be issued ***(E/D)***	3.02

[#] *The number of outstanding ordinary shares of Demerged Company has been computed based on the Exchange Ratio recommended by us, hereinafter in this Report, and the outstanding number of equity shares of TEIL and SSEL as on date. The actual number of outstanding ordinary shares of Demerged Company (post the Proposed Amalgamation) could be different considering the impact of fractional entitlements, if any, for the Proposed Demerger.*

The Entitlement Ratio has been determined based on the capital structure of Resulting Company as on the date of issuance of this Report and the proposed equity stake to be held by Demerged Company in Resulting Company pursuant to the Proposed Demerger.

In view of the above, we note that the Proposed Demerger will not have any impact on the beneficial economic interest of the shareholders of Demerged Company as the equity shareholders of Demerged Company would continue to have the same beneficial economic interest in the PTB Undertaking, now by way of indirect ~30% equity ownership of Resulting Company through Demerged Company and direct ~70% equity ownership of Resulting Company. As the proposed Demerger will not affect the beneficial economic interest of the equity shareholders of Demerged Company, valuation of Resulting Company and PTB Undertaking has no bearing on the recommended Entitlement Ratio and accordingly, we have not carried out any valuation in the instant case.

Accordingly, the valuation under the valuation approaches mentioned in the format prescribed under BSE Circular No. LIST/COMP/02/2017-18 dated 29 May 2017 and NSE Circular No. NSE/CML/2017/12 dated 01 June 2017 are not applicable in the given case.

Recommendation of Exchange Ratio for the proposed amalgamation of SSEL with TEIL:

In light of the above and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above including scope, limitations and assumptions described in this report and the engagement letter, we recommend the Exchange Ratio as follows:

To the equity shareholders of SSEL

*"**100 (One Hundred)** equity shares of TEIL having a face value of INR 1 each fully paid-up shall be issued **for every 137 (One Hundred and Thirty Seven)** equity shares held in SSEL having face value of INR 10 each fully paid-up".*

Recommendation of Entitlement Ratio for the proposed demerger of the PTB Undertaking of Demerged Company into TPTL:

In light of the above, the Entitlement Ratio as indicated above is fair and reasonable considering that the Proposed Demerger will not have any impact on the economic and beneficial interest of the equity shareholders of the Demerged Company and is value neutral.

Entitlement Ratio *(rounded off)*:

"1 (One) equity share of INR 2 each fully paid up of TPTL for every 3 (Three) equity shares of INR 1 each fully paid up held in Demerged Company.

Bases and Premise of Valuation

Our valuation analysis of the equity shares of TEIL and SSEL is in conformity with the ICAI Valuation Standards, 2018 issued by the Institute of Chartered Accountants of India. The valuation of the equity shares of the Companies as on the Valuation Date is carried out in accordance with ICAI VS, considering 'relative value' base and 'going concern value' premise. Any change in the valuation base or the valuation premise would impact the valuation outcome.

Valuation Approaches

A brief explanation of each valuation approach is provided below.

Income Approach

The income approach provides an estimate of the present value of the monetary benefits expected to flow to the owners of the business. It requires the projection of the cash flows that the business is expected to generate. These cash flows are then converted to their present value by means of discounting, using a rate of return that accounts for the time value of money and the appropriate degree of risk in the investment. The value of the business is the sum of the discounted cash flows.

Market Approach

The market approach considers actual arm's-length transactions for which the market value of investments alternative to the subject company can be observed. The value of a company or an ownership interest in the company can be estimated by developing relevant multiples for the comparative companies that relate value to underlying revenue, earnings, or cash flow variable, and then applying these multiples to the comparable underlying revenue, earnings, or cash flow variable for the subject company. The value multiples can be derived from guideline public company and comparable transactions of publicly traded companies or private companies.

Cost (Asset-Based) Approach

The asset-based (net underlying assets) approach is a form of the cost approach. The values of the individual assets (i.e., current, fixed, and intangible) of the business are estimated. The sum of the individual asset values represents the total asset value of the enterprise. The enterprise's liabilities related to working capital are deducted to arrive at an indication of value for the invested capital of the business. Because the cost approach does not always reflect the full value of intangible assets, it is often not appropriate to value an operating business completely on the basis of this approach without giving weights to other valuation methods. The cost approach may be relevant to the value of an operating business that is not sufficiently profitable and whose "breakup" values may be greater than its going concern value.

Valuation Methodologies

The valuation methodology to be adopted varies from case to case depending upon different factors affecting valuation. Different methodologies are adopted for the valuation of manufacturing, investment, consultancy, and trading companies.

Though there are no thumb rules for valuation, the method to be adopted has to be appropriate to the particular purpose for which valuation is being done as well as the attendant circumstances of each case. For example, a manufacturing company is generally valued on the combination of asset

value and the earning potential of the business. An investment company is valued on the basis of the value of underlying assets.

However, the value is specific to the point in time and may change with the passage of time. The value is derived in the context of an existing environment that includes economic conditions, state of industry/market and state of business activities of companies being valued etc. as of the appointed date of valuation. The basis of valuation would depend upon the purpose of valuation, the type of business, the future prospects and other attendant circumstances.

Discounted Cash Flow Method ("DCF") – Income Approach

The DCF method values the asset by discounting the cash flows expected to be generated by the asset for the explicit forecast period and also the perpetuity value (or terminal value) in the case of assets with an indefinite life. The DCF method is one of the most common methods for valuing various assets such as shares, businesses, real estate projects, debt instruments, etc. This method involves discounting of future cash flows expected to be generated by an asset over its life using an appropriate discount rate to arrive at the present value. The important inputs for the DCF method are (a) Cash flows; (b) Discount rate; and (c) Terminal value.

(a) The following are the cash flows that are used for the projections:

- Free Cash Flows to Firm ("FCFF"): FCFF refers to cash flows that are available to all the providers of capital, i.e. equity shareholders, preference shareholders and lenders. Therefore, cash flows required to service lenders and preference shareholders such as interest, dividend, repayment of principal amount and even additional fund-raising are not considered in the calculation of FCFF.
- Free Cash Flows to Equity ("FCFE"): FCFE refers to cash flows available to equity shareholders and therefore, cash flows after interest, dividend to preference shareholders, principal repayment and additional funds raised from lenders/preference shareholders are considered.

(b) Appropriate Discount Rate - Discount Rate is the return expected by a market participant from a particular investment and shall reflect not only the time value of money but also the risk inherent in the asset being valued as well as the risk inherent in achieving future cash flows. In discounting the FCFF the appropriate discount rate is the weighted average cost of capital, which results in the enterprise value of the company. Whereas, in the case of FCFE the appropriate discount rate is the cost of equity, which results in the equity value of the company.

(c) Terminal Value – It represents the present value at the end of the explicit forecast period of all subsequent cash flows to the end of the life of the asset or into perpetuity if the asset has an indefinite life. There are different methods for estimating the terminal value. The commonly used methods are:

- Gordon (Constant) Growth Model;
- Variable Growth Model; and
- Exit Multiple;

Capitalization of Free Cash Flows Method – Income Approach

The capitalization of free cash flows method is an income-based approach which is used to value a business based on future estimated free cash flow to equity or free cash flow to the firm generated

by a company. The projected free cash flow is capitalized using an appropriate capitalization rate. This method expresses a relationship between the following:

- Estimated future benefits (earnings or cash flows)
- Yield (required rate of return) on either equity or total invested capital (capitalization rate)

It is important that any income or expense items generated from non-operating assets and liabilities be removed from estimated future benefits prior to applying this method. The value of net non-operating assets and liabilities is then added to the value of the business derived from the capitalization of earnings. The capitalization of FCFE/FCFF is a single period method that assumes a stable level of cash flow. This method is appropriate for valuing companies which have reached a stable stage and are expected to generate a stable level of cash flow in the future years.

Market Price Method – Market Approach

The market price of an equity share as quoted on a stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares.

Comparable Companies Multiples Method – Market Approach

This method involves reviewing valuation multiples for companies that are in the same or similar line of business as the company being valued and then applying the relevant valuation multiples to the subject company to determine its value. The theory behind this approach is that valuation measures of similar companies, as manifested through stock market valuations of listed comparable companies, should represent a good proxy for the specific company being valued. Depending on the source of data available and the underlying company being valued, a variety of valuation measures might be used including Enterprise Value ("EV") to Sales, EV to EBITDA, Price to Earnings, etc.

Comparable Transactions Multiples Method – Market Approach

This method involves reviewing transaction multiples for companies that are in the same or similar line of business as the company being valued and then applying the relevant transaction multiples to the subject company to determine its value. The transaction multiples are determined for the comparable transactions for which financial details are available in the public domain. The theory behind this approach is that valuation measures of similar companies, as manifested through market transactions (i.e. acquisition or equity funding), should represent a good proxy for the specific company being valued. Depending on the source of data available and the underlying company being valued, a variety of valuation measures might be used including Enterprise Value (EV) to Sales, EV to EBITDA, Price to Earnings, etc.

Net Assets Value Method – Cost (Asset-Based) Approach

The net asset value method is an asset-based approach to valuation where the value of the business is based on the difference between the value of the assets and liabilities of the business.

Recommendation of Fair Equity Share Exchange Ratio

The fair basis for recommending the share exchange ratio for the Draft Composite Scheme of Arrangement of TEIL and SSEL is dependent upon various factors and considerations mentioned

here in this report. Though different values have been arrived at under different methods, for the purposes of recommending a ratio of exchange it is necessary to arrive at a single value for the shares of the companies. It is however important to note that in doing so, we are not attempting to arrive at the absolute values of the shares of each company. Our exercise is to work out the relative value of shares of the Companies to facilitate the determination of the fair share exchange ratio. For this purpose, it is necessary to give appropriate weightage to the values arrived at under each approach.

We have independently applied the approaches/methods discussed above, as considered appropriate, and arrived at their assessment of the relative values per equity share of the Companies. To arrive at the fair equity share exchange ratios for the Draft Composite Scheme of Arrangement, suitable minor adjustments/rounding off have been done in the relative values arrived by Finvox.

The fair equity share exchange ratio has been arrived on the basis of a relative valuation of equity shares of the Companies based on the approaches explained herein and various qualitative factors relevant to the companies and the business dynamics and growth potential of the businesses, having regard to information base, management representation and perceptions, key underlying assumptions and limitations.

In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgement taking into account all the relevant factors. There will always be several factors, e.g. present and prospective competition, yield on comparable securities and market sentiments, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share.

In light of the above and on consideration of all the relevant factors and circumstances as discussed and outlined hereinabove in this report, we recommend the following fair equity share exchange ratio for the Draft Composite Scheme of Arrangement whose computation as required as per BSE Circular number LIST/COMP/02/2017-18 dated May 29, 2017 and NSE Circular number NSE/CML/2017/12 dated June 01, 2017.

The calculation of the fair equity share exchange ratio of TEIL and SSEL is presented in the exhibit below:

Notes to Exhibit:

- Asset Approach: As of the Valuation Date, TEIL and SSEL are intended to be continued on a going concern basis and there is no intention to dispose-off the assets/business. In a going concern scenario, the earning power, as reflected under the income/market approach, is of greater importance to the basis of arrangement, with the values arrived at on the net asset basis being of limited relevance. Accordingly, the asset approach was not used for the valuation of TEIL and SSEL.

- Income Approach: Given the operating nature of the business of TEIL and of SSEL and based on the multi-year projections provided by the Management, we have applied the income approach, utilizing the discounted cash flow method to compute the enterprise value of TEIL and SSEL. We made appropriate adjustment to the enterprise value for outstanding loans, contingent liabilities, cash and cash equivalents, value of investments and other non-operating assets/liabilities, after considering the tax wherever applicable, to arrive at the equity value and fair value per share of TEIL and SSEL.

- Market Approach: The value of equity shares of TEIL and SSEL are calculated based on the market price method, using the market pricing formula given in the ICDR regulations and the comparable companies multiples method.

  (i) Market Price Method

  As previously discussed, TEIL is listed on BSE and NSE whereas, SSEL is only listed on BSE. As of the Valuation Date, the equity share of both TEIL and SSEL are frequently traded on the stock exchanges.

  According to Section 164(1) of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, ("ICDR") for issuers that have been listed on a recognized stock exchange for a period of 90 days or more as of the relevant date, the price of equity shares to be allotted pursuant to the preferential issue shall not be less than higher of the following:

  - The 90 trading days' Volume Weighted Average Price ("VWAP") of related equity shares quoted on the recognized stock exchange preceding the relevant date.

  - The 10 trading days' VWAP of related equity shares quoted on the recognized stock exchange preceding the relevant date.

  Based on the guidance given in the ICDR regulations for determining the share price, we have calculated the per share of TEIL (based on NSE) and SSEL (based on BSE) using the formula of 90 days/10 days VWAP.

  (ii) Comparable Companies Multiples Method

  In order to calculate the enterprise value of TEIL and SSEL, we used the EV/EBITDA multiples of the comparable listed companies in India. We made appropriate adjustment to the enterprise value for outstanding loans, contingent liabilities, cash and cash equivalents, value of investments and other non-operating assets/liabilities, after considering the tax wherever applicable, to arrive at the equity value and fair value per share of TEIL and SSEL.

(iii) Comparable Transactions Multiples Method

Our search for comparable transactions with a similar core business, sales size and other attributes did not yield a sufficient number of results to adequately perform this method. Accordingly, the comparable transactions multiples method was not used in our valuation of TEIL and SSEL.

VALUATION APPROACHES FOR PROPOSED AMALGAMATION

Bases and Premise of Valuation

Valuation of the equity shares of TEIL and SSEL as on the Valuation Date is carried out in accordance with ICAI VS, considering 'relative value' base and 'going concern value' premise. Any change in the valuation base, or the valuation premise could have a significant impact on the valuation outcome of the TEIL and SSEL.

The following are commonly used and accepted methods for determining the value of the equity shares of a company:

1. Cost Approach – Net Asset Value method
2. Market Approach:
    a) Market Price method
    b) Comparable Companies Multiple method
3. Income Approach – Discounted Cash Flow method

Each of the aforesaid approaches proceeds on different fundamental assumptions which have greater or lesser relevance and at times even no relevance, to a given situation. Thus, the approach to be adopted for a particular valuation exercise must be judiciously chosen.

For the Proposed Amalgamation, we have considered the following commonly used and accepted methods for determining the value of equity shares of TEIL and SSEL for the purpose of recommending Exchange Ratio to the extent relevant and applicable:

1. Cost Approach - Net Asset Value Method ('NAV')

The Cost Approach reflects the amount that would be required currently to replace the service capacity of an asset; often referred to as current replacement cost.

TEIL and SSEL

In the present case, the business of TEIL and of SSEL is intended to be continued on a 'going concern basis' and there is no intention to dispose-off the assets, therefore the Cost Approach is not adopted for the present valuation exercise.

2. Market Approach

a) Market Price ('MP') Method

The market price of an equity share as quoted on a stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares.

TEIL and SSEL

In the present case, the equity shares of TEIL are listed on both NSE and BSE whereas for SSEL is listed on BSE. The value of equity shares of TEIL and SSEL under this method is determined considering the share prices of TEIL on NSE and SSEL on BSE over an appropriate period.

b) Comparable Companies' Multiple (CCM) / Comparable Transactions Multiples (CTM) Method

Under CCM method, the value of equity shares of companies is determined by using multiples derived from valuations of comparable companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for material differences, if any.

TEIL and SSEL

In the present case, the businesses of TEIL and SSEL have been valued based on Enterprise Value ('EV') to Earnings before Interest, Tax, Depreciation and Amortisation ('EBITDA') multiple of comparable listed companies to arrive at EV of TEIL and SSEL.

To the value so arrived, appropriate adjustments have been made for loan funds, contingent liabilities, cash and cash equivalents, value of investments and other assets/liabilities, after considering the tax wherever applicable to arrive at the equity value and fair value per share of TEIL and SSEL.

Under CTM, the value of shares / business of a company is determined based on market multiples of publicly disclosed transactions in the similar space as that of the subject company. Multiples are generally based on data from recent transactions in a comparable sector, but with appropriate adjustment after consideration has been given to the specific characteristics of the business being valued.

TEIL and SSEL

Based on our analysis and discussion with the Management, we understand that there are no sufficient recent comparable transactions, data of which is available in public domain, involving companies of similar nature and having a similar operating / financial metrics as that of TEIL and SSEL, we have therefore not used CTM method to value the equity shares of these companies.

3. Income Approach - Discounted Cash Flows Method ('DCF')

Under the Income Approach, equity shares of TEIL and SSEL are valued using DCF Method.

Under DCF method, the projected free cash flows from business operations, after considering fund requirements for projected capital expenditure and incremental working capital for each business, are discounted at the respective Weighted Average Cost of Capital (WACC). The sum of the discounted value of such free cash flows and discounted value of perpetuity is the value of the business.

The free cash flows represent the cash available for distribution to both the owners and the creditors of the business. The free cash flows are determined by adding back to earnings before interest and tax (i) depreciation and amortizations (non-cash charge), and (ii) any non-operating item. The cash flow is adjusted for outflows on account of (i) capital expenditure, (ii) incremental working capital requirements and (iii) tax.

WACC is considered as the most appropriate discount rate in the DCF Method, since it reflects both the business and the financial risk of the company. In other words, WACC is the weighted average of cost of equity and cost of debt of the respective companies.

To the value so arrived, appropriate adjustments have been made for loan funds, contingent liabilities, cash and cash equivalents, value of investments and other assets/liabilities, after considering the tax wherever applicable to arrive at the equity value.

As mentioned above, we have considered a combination of Market Approach and Income Approach for arriving at the relative value per equity share of TEIL and SSEL.

Exchange Ratio:

Valuation Approach	TEIL		SSEL	
	Value per Share (INR)	Weights	Value per Share (INR)	Weights
Asset/Cost Approach*	NA	NA	NA	NA
Income Approach				
- DCF Method	460.57	50%	337.47	50%
Market Approach				
- MP Method	460.16	25%	365.63	25%

Relative value per share	**458.97**		**335.62**	
Exchange Ratio *(rounded off)*	**100 : 137**			

NA = Not Applied / Applicable

** Since, the businesses of TEIL and SSEL are both intended to be continued on a 'going concern basis' and there is no intention to dispose-off the assets, therefore the 'Asset' approach is not adopted for the present valuation exercise.*

6. Valuation Report

Valuers have recommended fair exchange ratio and fair entitlement ratio vide its report dated December 9, 2024, on the basis of analysis and analytical review and relative valuation of the respective companies and opined that the share exchange ratio and share entitlement ratio as described below are fair and reasonable for all the shareholders and the companies involved in the scheme.

7. Fairness Opinion–

We have reviewed the important factors considered by the Valuersin their Joint valuation Report dated December 9, 2024 for the purpose of valuation analysis.

I. With respect to Recommendation of Exchange Ratio for the proposed amalgamation of SSEL with TEIL

In light of the above and on consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the exchange ratio as follows:

"To the equity shareholders of SSEL "100 (One Hundred) equity shares of TEIL having a face value of INR 1 each fully paid-up shall be issued for every 137 (One Hundred and Thirty -Seven) equity shares held in SSEL having face value of INR 10 each fully paid-up".

II. With respect to the Recommendation of Entitlement Ratio for the proposed demerger of Demerged Business of Demerged Company into TPTL

In light of the above, the Entitlement Ratio as indicated below is fair and reasonable considering that the Proposed Demerger will not have any impact on the economic and beneficial interest of the equity shareholders of the Demerged Company and is value neutral.

Entitlement Ratio *(rounded off)*:

"1 (One) equity share of INR 2 each fully paid up of TPTL for every 3 (Three) equity shares of INR 1 each fully paid up held in Demerged Company.

4) SSEL

(INR crores)

Particulars	2024-25	2025-26	2026-27	2027-28	2028-29
Revenue from Operations	260.22	548.74	602.12	637.82	675.52

The increase in EBITDA margin is on account of change in ownership and management of SSEL in FY 2024-25, revival efforts put in by the new management and promoters, plugging the inefficiencies of earlier operations, and thereafter the expected revenue growth and economies of scale from FY 2025-26 onwards.

As explained in the Joint Valuation Report, the proposed demerger of PTB Undertaking from TEIL will not have any impact on the beneficial economic interest of the shareholders of Demerged Company as the equity shareholders of Demerged Company would continue to have the same beneficial economic interest in the PTB Undertaking, now by way of indirect ~30% equity ownership of Resulting Company through Demerged Company and direct ~70% equity ownership of Resulting Company. As the proposed Demerger will not affect the beneficial economic interest of the equity shareholders of Demerged Company, valuation of Resulting Company and PTB Undertaking has no bearing on the recommended Entitlement Ratio and accordingly, We did not perform any valuation of the Demerged Undertaking and the Resultant Company.

OBJECT OF THE ISSUE / PROPOSED SCHEME

Details of means of finance, Name of monitoring agency etc. - Not applicable as Triveni Power Transmission Limited is not offering securities / equity shares through an initial public offer to the public at large, pursuant to the Scheme.

Details and reasons for non-deployment or delay in deployment of proceeds or changes in utilization of issue proceeds of past public issues / rights issue, if any, of the Company in the preceding 10 years: Not Applicable

Rationale for the Scheme:

The management of the respective Participating Companies are of the view that the arrangement proposed in this Scheme is, in particular, expected to have the following benefits:

(a) Both the Amalgamating Company and the Amalgamated/Demerged Company Company have manufacturing verticals of sugar and distillery; therefore, the proposed amalgamation of the Amalgamating Company into the Amalgamated/Demerged Company Company would lead to the consolidation of all operations pertaining to the manufacture of the sugar, alcohol, ethanol in one entity.

(b) The proposed amalgamation will create and provide operational synergies, economies of scale, optimum utilization of resources, simplification of business processes, elimination of duplication and rationalization of administrative expenses, which will lead to savings in the costs.

(c) It will help in achieving consolidation, greater integration and flexibility that will maximize overall shareholder's value and improve the competitive position and negotiating power of the combined entity.

(d) It will result in reduction of multiplicity of entities, thereby reducing compliance cost of multiple entities viz., statutory filings, regulatory compliances, labour law/ establishment related compliances.

(e) Further, the demerger of the PTB Undertaking of the Demerged Company into the Resulting Company, pursuant to this Scheme shall be in the interest of all concerned stakeholders including shareholders, customers, creditors, employees and general public, in the following ways:

(i) The PTB and the Residual Business (*defined hereinafter*) address different market segments with unique opportunities and dynamics in terms of business strategy, customer set, geographic focus, competition, capabilities set, talent needs and distinct capital requirements. The transfer of the PTB Undertaking into the Resulting Company will enable each business to sharpen its focus and organize its activities and resources to improve its offerings to their respective customers. This would help to improve its competitiveness, operational efficiency, agility and strengthen its position in relevant markets resulting in more sustainable growth and competitive advantage.

Triveni Power Transmission Ltd.

(ii) PTB has attained a significant size, scale and has a large headroom for growth in its market. As PTB is entering the next phase of growth, the transfer and vesting of the PTB Undertaking into the Resulting Company pursuant to this Scheme would result in focused management attention and efficient administration to maximize its potential.

(iii) Further, as PTB has separate growth trajectories, risk profile and capital requirement, the segregation of the PTB Undertaking and the Residual Business will enable independent value discovery and lead to unlocking of value for each business.
